

**NORTH YORKSHIRE POLICE, FIRE AND CRIME COMMISSIONER (FIRE & RESCUE
AUTHORITY)**

EXECUTIVE BOARD

Report of the Chief Finance Officer

25th February 2020

TREASURY MANAGEMENT

1.0 Purpose of Report

- 1.1 To present an updated Annual Treasury Management Strategy for the financial year 2020/21 which incorporates:
- a) the Annual Investment Strategy
 - b) a Minimum Revenue Provision Policy
 - c) a Capital Strategy

2.0 Background

- 2.1 The Authority is required to operate a balanced budget, which broadly means that cash raised during the year will meet cash expenditure. Part of the treasury management operation is to ensure that this cash flow is adequately planned, with cash being available when needed.
- 2.2 The second main function of the treasury management service is the funding of the Authority's capital plans. These capital plans provide a guide to the borrowing need of the Authority, essentially the longer-term cash flow planning, to ensure that the Authority can meet its capital spending obligations. This management of longer-term cash may involve arranging long or short term loans or using longer term cash flow surpluses. On occasion, any debt previously drawn may be restructured to meet Authority risk or cost objectives.
- 2.3 CIPFA defines treasury management as:
"The management of the local authority's investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks."
- 2.4 North Yorkshire County Council currently provides most of the Authority's Treasury Management arrangements under the terms of the Service Level Agreement. Under this agreement the County Council is required to comply with the terms of the Authority's approved Annual Treasury Management Policy Statement and Annual Treasury Management and Investment Strategy. This includes providing advice to the Authority on any necessary changes required at the time of annually updating these documents. In addition, the Authority uses Link Asset Services - Treasury Solutions (previously Capita Asset Services) as its external treasury management advisors via the Service Level Agreement.
- 2.5 Internal cash balances are invested in low risk counterparties or instruments commensurate with the County Council's low risk appetite, providing adequate liquidity initially before considering investment return.

- 2.6 The Authority is currently forecasting year end cash balances in the order of £3,900,000 at 31st March 2020. Depending on the timing of cash flows of receipts and payments throughout the year, balances available for investment daily are likely to increase to around £9,000,000 at points throughout 2020/21. The magnitude of these sums available for investment reinforces the importance of having robust Treasury Management strategies and policies.
- 2.7 Current reporting arrangements for the reporting of Treasury Management activities comprise the receipt by the Police, Fire and Crime Commissioner (PFCC) of an Annual Strategy and plan in advance of the year. The PFCC will receive as a minimum, a mid-year review and an annual report after its close.
- 2.8 The Executive Board considered the Authority's Treasury Management mid-year Review at its meeting on 28th January 2020.
- 2.9 The Capital Programme has undergone significant review during 2018/19 as part of the Future Budget and Efficiency Plan which commenced in June 2018 to address a shortfall in the Authority's MTFP. Review has continued throughout the preparation of the 2020/21 MTFP to ensure the correct provision of assets in the context of the amount of capital borrowing that the Service can sustain over the medium term. Consideration has also been given to funding of the programme specifically:
- (a) the amount of capital receipts to be applied against capital expenditure in the years 2019/20 and 2020/21
 - (b) the use of internal borrowing (from cash balances) due to the current low level of interest rates and the differential between the cost of borrowing from PWLB and borrowing internally (i.e. the interest forgone by not investing the cash balances)
 - (c) It is planned to create a capital reserve in 2020/21 through a revenue contribution to capital within the MTFP 2020/21 to 2023/24. The Authority will plan to borrow to fund Estates and Fleet expenditure and the revenue contribution creates a reserve which moves up and down in line with the Capital plan to fund IT expenditure and other capital requirements

A borrowing strategy incorporating these reduces the rate of increase and the incidence of capital financing costs over the period 2020/21 and 2021/22 delivering financial savings for the Authority, whilst also mitigating credit risk through holding investments in the market.

3.0 Treasury Management reporting

- 3.1 The Authority is currently required to receive and approve, as a minimum, three main treasury reports each year, which incorporate a variety of policies, estimates and actuals.
- a) **Treasury Management Strategy** (this report) - is forward looking and covers:
 - the capital plans, (including prudential indicators)
 - a minimum revenue provision (MRP) policy, (how residual capital expenditure is charged to revenue over time)
 - the treasury management strategy, (how the investments/borrowings are to be organised), including treasury indicators; and
 - an investment strategy, (the parameters on how investments are to be managed).
 - b) **A mid-year treasury management report** - primarily a progress report and will update **members** on the capital position, amending prudential indicators as necessary, and whether any policies require revision.

- c) **An annual treasury outturn report** - a backward looking review document which provides details of a selection of actual prudential and treasury indicators and actual treasury operations compared to the estimates within the strategy.

4.0 Annual Treasury Management Strategy and Investment Strategy and Minimum Revenue Provision Policy 2020/21

4.1 The **CIPFA Prudential Code for Capital Finance in Local Authorities** (as updated in 2017) and the terms of the **Local Government Act 2003**, together with 'statutory' Government Guidance, establish further requirements in relation to treasury management matters, namely

- a) the approval, on an annual basis, of a set of **Prudential Indicators**. The Prudential indicators will be set based on the Capital Programme included within the included within the Medium Term Financial Plan (MTFP) 2020/21 to 2023/24 and Capital Plans 2020/21 to 2023/24 elsewhere on the agenda.
- b) the approval, on an annual basis, of an **Annual Treasury Management Strategy**, an **Annual Investment Strategy**, an annual **Minimum Revenue Provision (MRP)** policy statement and a **Capital Strategy**

4.2 Treasury Management Strategy 2020/21

The Treasury Management strategy for 2020/21 covers two main areas:

- a) **Capital issues**
- the capital expenditure plans and the associated prudential indicators; and
 - the minimum revenue provision (MRP) policy.
- b) **Treasury management issues**
- treasury indicators which limit the treasury risk and activities of the Authority
 - the current treasury position
 - prospects for interest rates
 - the borrowing strategy
 - policy on borrowing in advance of need
 - debt rescheduling
 - the investment strategy
 - creditworthiness policy; and
 - the policy on use of external service providers.

4.3 Treasury Management Policy Statement (TMPS)

- stating the Authority's policies, objectives and approach to risk management of its Treasury Management activities
- a framework of suitable **Treasury Management Practices (TMPs)** setting out the way the Authority will seek to achieve the policies and objectives set out in (a) and prescribing how it will manage and control those activities. The Code recommends 12 TMPs.

The Treasury Management Policy Statement is attached as **Appendix A** and reflects only very minor changes for 2020/21.

4.4 **Annual Investment Strategy**

By virtue of the Service Level Agreement with North Yorkshire County Council, the Authority has adopted the Annual Investment Strategy of the Council which is embedded within the terms of the agreement and within the services which the Council provides on the Authority's behalf. NYCC's Annual Treasury Management and Investment Strategy for 2020/21 was approved on 28th February 2020.

The Government's guidance on the Annual Investment Strategy, updated in 2018, states that authorities can combine the Treasury Management Strategy Statement and Annual Investment Strategy into one report. The Authority has adopted this combined approach.

4.5 **Minimum Revenue Policy (MRP)**

The Authority is required to determine the amount of MRP it considers prudent for each financial year. The MRP Policy is based on the Government's statutory guidance.

4.6 **Capital Strategy**

The aim of the capital strategy is to ensure that those in charge of governance, and Officers fully understand the overall long-term policy objectives and resulting capital strategy requirements, governance procedures and risk appetite. It includes:

- a high-level long-term overview of how capital expenditure, capital financing and treasury management activity contribute to the provision of services.
- an overview of how the associated risk is managed; and
- the implications for future financial sustainability

The Capital Strategy is attached at **Appendix C**.

5.0 **Approved Lending List**

5.1 The current Approved Lending List is attached to this report as **Schedule A** to the Annual Treasury Management and Investment Strategy 2020/21 (**Appendix B**). The List, however, continues to be monitored on an ongoing basis and changes made as appropriate by the Corporate Director - Strategic Resources to reflect credit rating downgrades/upgrades, mergers or market intelligence and rumours that impact on the credit 'score' and colour coding.

5.2 Local Authorities will continue to be included on the Approved Lending List for 2020/21, although suitable investment opportunities with them are limited. As a result of the way they are financed and their governance arrangements, Local Authorities are classed as having the highest credit rating.

5.3 The Debt Management Office (DMO), is a deposit account within HMT (regarded as lending to the Government) and continues to be included on the Approved Lending List.

6.0 Recommendations

6.1 That the PFCC is asked to approve:

- a) The Treasury Management Policy Statement as attached at **Appendix A**
- b) the annual Treasury Management and Investment Strategy for 2019/20 as detailed in **Appendix B** and in particular:
 - (i) an authorised limit for external debt of £18.9m in 2020/21
 - (ii) an operational boundary for external debt of £17.9m in 2020/21
 - (iii) the Prudential and Treasury Indicators
 - (iv) a limit of 20% (estimated at £780,000) of the overall balances can be considered for longer term investments over 365 days subject to comparative yields on short term investments
 - (v) a Minimum Revenue Provision (MRP) policy for debt repayment to be charged to revenue in 2020/21 as set out in **paragraph 2** which incorporates a change from the Asset Life method to the Depreciation method for locally agreed Prudential Borrowing (unsupported borrowing) on capital expenditure incurred after 1 April 2008
 - (vi) the Capital Strategy as attached as **Appendix C**
 - (vii) the Chief Finance Officer report to the PFCC/Executive Board in respect of in year Treasury Management issues

NORTH YORKSHIRE POLICE, FIRE AND CRIME COMMISSIONER (FIRE & RESCUE AUTHORITY)
--

TREASURY MANAGEMENT POLICY STATEMENT

1.0 BACKGROUND

- 1.1 The Authority has adopted the **CIPFA Code of Practice on Treasury Management in the Public Services** as updated in 2017. This Code sets out a framework of operating procedures to reduce treasury risk and improve understanding and accountability regarding the Treasury position of the Authority.
- 1.2 The CIPFA Code of Practice on Treasury Management requires the Authority to adopt the following four clauses of intent:
- (a) the Authority will create and maintain as the cornerstone for effective Treasury Management
 - (i) a strategic **Treasury Management Policy Statement** (TMPS) stating the policies, objectives and approach to risk management of the Authority to its treasury management activities.
 - (ii) a framework of suitable **Treasury Management Practices** (TMPs) setting out the way the Authority will seek to achieve those policies and objectives and prescribing how it will manage and control those activities. The Code recommends 12 TMPs.
 - (b) receipt by the PFCC of an annual strategy and plan in advance of the year. The organisation (Executive Board) will receive as a minimum, a mid-year review and an annual report after its close, in the form prescribed in the TMPs.
 - (c) the Authority maintains responsibility for the implementation and regular monitoring of its Treasury Management policies and practices, and delegates the execution and administration of Treasury Management decisions to the Chief Officer who will act in accordance with the Authority's TMPS, TMPs, as well as CIPFA's Standard of Professional Practice on Treasury Management;
 - (d) the Authority nominates the Chief Finance Officer to be responsible for ensuring effective scrutiny of the Treasury Management Strategies and Policies.
- 1.3 The **CIPFA Prudential Code for Capital Finance in Local Authorities** (updated in 2017) and the terms of the **Local Government Act 2003**, together with 'statutory' Government Guidance, establish further requirements in relation to treasury management matters, namely
- (a) the approval, on an annual basis, of a set of **Prudential Indicators** and
 - (b) the approval, on an annual basis, of an **Annual Treasury Management Strategy**, an **Annual Investment Strategy**, an annual **Minimum Revenue Provision (MRP)** policy statement and a **Capital Strategy** with an associated requirement that each is monitored on a regular basis with a provision to report as necessary both in-year and at the financial year end.

2.0 TREASURY MANAGEMENT POLICY STATEMENT (TMPS)

- 2.1 Based on the requirements detailed above a TMPS stating the policies and objectives of the treasury management activities of the Authority is set out below.
- 2.2 The Authority defines the policies and objectives of the treasury management activities of the Authority as follows:
- (a) the management of the Authority's investments and cash flows, its banking, money market and capital market transactions, the effective control of the risks associated with those activities, and the pursuit of optimum performance consistent with those risks;
 - (b) the identification, monitoring and control of risk will be the prime criteria by which the effectiveness of the treasury management activities will be measured. Accordingly, the analysis and reporting of treasury management activities will focus on their risk implications for the Authority and any financial instrument entered into to manage these risks; and
 - (c) effective treasury management will provide support towards the achievement of the business and service objectives of the Authority as expressed in the Corporate Plan. The Authority is committed to the principles of achieving value for money in treasury management, and to employing suitable comprehensive performance measurement techniques, within the context of effective risk management.
- 2.3 As emphasised in the Treasury Management Code of Practice, responsibility for risk management and control of Treasury Management activities lies wholly with the Authority and all officers involved in Treasury Management activities are explicitly required to follow Treasury Management policies and procedures.

3.0 TREASURY MANAGEMENT PRACTICES (TMPs)

- 3.1 The CIPFA Code of Practice on Treasury Management requires a framework of Treasury Management Practices (TMPs) which:
- (a) set out the way the Authority will seek to achieve the policies and objectives; and
 - (b) prescribe how the Authority will manage and control those activities.
- 3.2 The CIPFA Code of Practice recommends 12 TMPs approved by North Yorkshire County Council's Audit Committee on 6th December 2012.
- 3.3 A list of the 12 TMPs is as follows: -
- TMP 1 Risk management
 - TMP 2 Performance measurement
 - TMP 3 Decision-making and analysis
 - TMP 4 Approved instruments, methods and techniques

TMP 5	Organisation, clarity and segregation of responsibilities, and dealing arrangements
TMP 6	Reporting requirements and management information arrangements
TMP 7	Budgeting, accounting and audit arrangements
TMP 8	Cash and cash flow management
TMP 9	Money Laundering
TMP 10	Training and qualifications
TMP 11	Use of external service providers
TMP 12	Corporate governance

4.0 PRUDENTIAL INDICATORS

4.1 The Local Government Act 2003 underpins the Capital Finance system introduced on 1 April 2004 and requires the Authority to “have regard to” the **CIPFA Prudential Code for Capital Finance in Local Authorities**. This Code, which was last updated in December 2017, requires the Authority to set a range of Prudential Indicators for the next three years

- (a) as part of the annual Budget process, and
- (b) before the start of the financial year

to ensure that capital spending plans are affordable, prudent and sustainable.

4.2 The Prudential Code also requires appropriate arrangements to be in place for the monitoring, reporting and revision of Prudential Indicators previously set.

4.3 The PFCC will approve the Prudential Indicators for a three-year period alongside the annual Revenue Budget/Medium Term Financial Strategy each year. The Indicators will be monitored during the year and revisions submitted as necessary.

5.0 ANNUAL TREASURY MANAGEMENT AND INVESTMENT STRATEGY

5.1 A further implication of the Local Government Act 2003 is the requirement for the Authority to set out its Treasury Management Strategy for borrowing and to approve an Annual Investment Strategy (which sets out the County Council’s policies for managing its investments and for giving priority to the security and liquidity of those investments).

5.2 The Government’s guidance on the Annual Investment Strategy, updated in 2018, states that authorities can combine the Treasury Management Strategy Statement and Annual Investment Strategy into one report. The Authority has adopted this combined approach.

5.3 Further statutory Government guidance, last updated with effect from February 2018, is in relation to an authority’s charge to its Revenue Budget each year for debt repayment. A Minimum Revenue Provision (MRP) policy statement must be prepared each year and submitted to the Authority for approval before the start of the financial year.

6.0 REVIEW OF THIS POLICY STATEMENT

- 6.1 A review of this Policy Statement and all associated documentation will be undertaken annually as part of the Revenue Budget process, together with a mid-year review and at such other times during the financial year as considered necessary by the Chief Finance Officer.

**NORTH YORKSHIRE POLICE, FIRE AND CRIME COMMISSIONER
(FIRE & RESCUE AUTHORITY)**

**ANNUAL TREASURY MANAGEMENT AND INVESTMENT STRATEGY
2020/21**

1.0 PRUDENTIAL INDICATORS 2020/21 TO 2022/23

1.1 Prudential Indicators

The Prudential Code requires authorities (including the PFCC) to self-regulate the affordability, prudence and sustainability of their capital expenditure and borrowing plans, by setting estimates and limits, and by publishing actuals, for a range of Prudential Indicators.

The key objectives of the Prudential Code are to ensure that:

- Capital expenditure plans are affordable, prudent and sustainable
- Treasury Management decisions are taken in accordance with professional good practice and in full understanding of the risks involved and how these risks will be managed to levels that are acceptable.

1.2 The Code imposes on authorities clear governance procedures for setting and revising of Prudential Indicators, and describes the matters to which an authority will have regard when doing so. This is designed to deliver accountability in taking capital financing, borrowing and Treasury Management decisions. A fundamental provision of the Prudential Code is that over the medium term net borrowing will only be for a capital purpose.

1.3 Under the Code, individual authorities are responsible for deciding the level of their affordable borrowing, having regard to the Code. Under the Code, the PCC is required to set a range of Prudential Indicators for the financial year 2020/21.

1.4 The Code states that Prudential Indicators for Treasury Management should be considered together with the Annual Investment Strategy. The indicators reflect the Capital Plan, existing commitments and associated financing costs as included within the Medium Term Financial Plan (MTFP) 2020-21 to 2023/24 and Capital Plans 2020/21 to 2023/24 elsewhere on the agenda.

1.5 Affordability

The following indicators are required to assess the affordability of the capital investment plans. They provide an indication of the impact of the capital investment plans on overall PFCC finances. The PFCC is requested to approve the following:

(i) **Estimated ratio of capital financing costs to the net Revenue Budget**

	2018/19	2019/20	2020/21	2021/22	2022/23
	Actual	Estimate	Estimate	Estimate	Estimate
	£000	£000	£000	£000	£000
Minimum Revenue Provision:					
PWLB Borrowing	799	824	822	891	1,085
Finance Lease	401	178	169	176	79
PFI	254	205	138	111	160
Interest Payable:					
PWLB borrowing	572	553	526	574	617
Finance Lease	40	28	24	16	9
PFI	406	358	304	279	309
Interest receivable	-74	-65	-60	-60	-60
Financing Costs	2,399	2,081	1,925	1,987	2,199
Net Revenue Stream	30,318	31,015	32,003	32,859	33,737
Ratio	7.9%	6.7%	6.0%	6.0%	6.5%
Ratio - Excluding PFI	6.0%	5.1%	4.8%	5.0%	5.3%

In 2020/21 the actual cost of financing is expected to be £1,925k: however, of this, £563k is attributable to the PFI schemes (£138k of MRP and £304k of interest). These PFI charges are covered by separate PFI grants.

1.6 Prudence

(i) **Capital Expenditure - Actual and Forecasts**

	2018/19	2019/20	2020/21	2021/22	2022/23
	Actual	Estimate	Estimate	Estimate	Estimate
	£000	£000	£000	£000	£000
Capital Expenditure	1,919	2,853	2,353	2,120	2,132
Funded by:					
Internal Borrowing	1,424	1,569	0	0	0
External Borrowing	0	0	2,147	1,949	2,019
Other Capital resources	495	1,284	206	171	113

The Authority's annual borrowing requirements consist of capital financing requirements plus replacement borrowing for debt repaid less a prudent Minimum Revenue Provision charged to revenue for debt payment. These borrowing requirements, after use of other capital resources, are set out above. Other capital resources include capital receipts and capital reserve transfers where required.

(ii) **Capital Financing Requirement (CFR)**

The CFR is the capital expenditure incurred historically by the Authority that has yet to be financed (i.e. external debt less Minimum Revenue Provision).

It measures the PFCC's underlying need to borrow for capital purposes and ensures that borrowing is only undertaken to fund capital assets and not support revenue expenditure.

	2018/19	2019/20	2020/21	2021/22	2022/23
	Actual	Estimate	Estimate	Estimate	Estimate
	£000	£000	£000	£000	£000
Opening Capital Financing Requirement	16,856	16,826	17,187	18,205	18,976
Unsupported Borrowing to fund Capital Exp.	1,424	1,569	2,147	1,949	2,019
Minimum Revenue Provision:					
Supported Borrowing	-265	-255	-245	-235	-300
Unsupported Borrowing	-533	-569	-577	-657	-785
PFI and Finance Leases	-655	-384	-308	-287	-238
Closing Capital Financing Requirement	16,826	17,187	18,205	18,976	19,671

The PFCC is required to make a statutory charge to revenue for the repayment of supported debt (the Minimum revenue Provision) and this reduces the CFR.

(iii) **Limits to Borrowing Activity**

Within the Prudential Indicators there are several indicators to ensure that the PFCC operates its activities within well defined limits.

For the first of these, the PFCC should ensure that its debt net of investments does not, except in the short term, exceed the total of the Capital Financing Requirement (CFR) in the preceding year, plus the estimate of any additional CFR for 2020/21 and the next two financial years.

	2019/20	2020/21	2021/22	2022/23
	Estimate	Estimate	Estimate	Estimate
	£000	£000	£000	£0010
Borrowing	14,384	15,961	17,586	17,852
PFI and Finance Leases	2,003	1,717	1,478	1,117
Investments	-3,900	-3,900	-3,900	-3,900
Net Borrowing	12,488	13,778	15,164	15,069
Total CFR for borrowing purposes	17,187	18,205	18,976	19,671

The projected forecasts detailed in the table above show that there is still some margin between the net borrowing and the CFR and therefore the PFCC is well within the limits required.

(iv) A further two prudential indicators control or anticipate the overall level of borrowing. These are:

(a) The **Authorised Limit** which represents the limit beyond which borrowing is prohibited and needs to be set and revised by the PFCC. Borrowing beyond this limit would be ultra

vires. The provision of temporary borrowing allows for temporary short term borrowing in year to allow for cash flow movements.

- (b) The **Operational Boundary** which is based on the probable external debt during the year. It includes scope for borrowing for revenue purposes that may be required in the short term during the year, if for instance a large grant payment was delayed.

The PFCC is asked to approve the following limits:

Authorised Limit for External Debt			2019/20	2020/21	2021/22	2022/23
			Estimate	Estimate	Estimate	Estimate
			£000	£000	£000	£000
Borrowing			12,610	14,384	15,961	17,586
PFI and Finance Leases			2,311	2,003	1,717	1,478
Provision for Temporary Borrowing			2,500	2,500	2,500	2,500
Net Borrowing			17,421	18,888	20,178	21,564
Operational Boundary for External Debt			2019/20	2020/21	2021/22	2022/23
			Estimate	Estimate	Estimate	Estimate
			£000	£000	£000	£000
Borrowing			12,610	14,384	15,961	17,586
PFI and Finance Leases			2,311	2,003	1,717	1,478
Provision for Temporary Borrowing			1,500	1,500	1,500	1,500
Net Borrowing			16,421	17,888	19,178	20,564

- (v) **Actual External Debt**

Actual External Debt			2019/20	2020/21	2021/22	2022/23
			Estimate	Estimate	Estimate	Estimate
			£000	£000	£000	£000
Borrowing			12,610	14,384	15,961	17,586
PFI and Finance Leases			2,311	2,003	1,717	1,478
Actual External Debt			14,921	16,388	17,678	19,064

1.7 Treasury Management Indicators

The purpose of these is to contain Treasury Management activity within certain limits, thereby reducing the risk or likelihood of an adverse movement in interest rates or borrowing decisions impacting negatively on the PFCC's overall financial position. The PFCC is asked to approve the following:

- (i) **Maturity Structure of borrowing**

		Lower Limit	Upper Limit
Due within:		%	%
Less than 1 year		0	10.0
Between 1-2 years		0	10.0
Between 2-5 years		0	20.0
Between 5-10 years		0	50.0
Between 10-20 years		0	100.0
Over 20 years		0	100.0

(ii) **Total principal sums invested for periods longer than 365 days**

Based on estimated levels of funds and balances, the need for liquidity and day to day cash flow requirements, it is forecast that £780,000 of the overall balances can be considered for longer term investments over 365 days subject to comparative yields on short term investments.

2.0 MINIMUM REVENUE PROVISION (MRP) POLICY FOR 2020/21

2.1 Local authorities are statutorily required to pay off an element of accumulated capital expenditure funded from borrowing (Capital Financing Requirement - CFR) through a charge to the Revenue Account (the Minimum Revenue Provision - MRP).

2.2 MHCLG Guidance (revised in 2018) requires the Authority to approve an MRP Policy Statement in advance of each year. The MRP guidance offers a range of options, with an overriding recommendation that there should be prudent provision. The proposed policy for 2020/21 is as follows:

- (a) for all **capital expenditure incurred before 1 April 2008**, MRP will be based on 4% of the Capital Financing Requirement (CFR) at that date;
- (b) for **capital expenditure incurred after 1 April 2008, which is supported by Government Borrowing Approvals**, MRP will similarly be based on 4% of such sums reflected in subsequent CFR updates;
- (c) for **locally agreed Prudential Borrowing (unsupported borrowing) on capital expenditure incurred after 1 April 2008**, 2 options are available:

Asset Life Method - The MRP for each asset acquired through unsupported borrowing is calculated using the following formulae:

$$\frac{A - B}{C}$$

Where:

- A = Capital expenditure (unsupported borrowing) on asset
- Total MRP already made against the asset
- C = Remaining useful life of the asset

Depreciation Method based on equal annual instalments over the estimated life of the asset for which the borrowing is undertaken using the following formulae:

$$\frac{A - B - D}{C}$$

Where:

- A = Capital expenditure (unsupported borrowing) on asset
- B = Total MRP already made against the asset
- C = Remaining useful life of the asset
- D = Residual Value of the Asset

The only difference between the two methods of calculating the MRP is that there is recognition in the Depreciation Method that the asset will still be worth 'something' after its useful life has expired.

The Authority has applied the Depreciation Method from 1st April 2019. This allows it to make a more prudent provision in that it will recognise, where applicable, that assets are still worth 'something' after their useful lives have expired and minimise the impact on revenue.

The estimated life of relevant assets will be assessed each year based on types of capital expenditure incurred but in general will be 40 years for property and land, and 5 to 15 years for vehicles, plant and equipment. To the extent that expenditure does not create a physical asset and is of a type that is subject to estimated life periods that are referred to in the guidance e.g. software licences, these periods will generally be adopted by the Authority.

The guidance also allows the Authority to defer the introduction of an MRP charge for new capital projects/land purchases until the year after that in which the new asset becomes operational, rather than in the year borrowing is required to finance the capital spending. This approach can be beneficial for projects that take more than one year to complete and is therefore included as part of the MRP policy.

- (d) For **“on balance sheet” PFI schemes**, MRP will be equivalent to the “capital repayment element” of the annual service charge payable to the PFI Operator and for finance leases, MRP will also be equivalent to the “capital repayment (principal) element” of the annual rental payable under the lease agreement.

2.3 Therefore the Authority's total MRP provision from 1 April 2020 will be the sum of (a) + (b) + (c) + (d) (as defined above) which is considered to satisfy the prudent provision requirement. Based on this policy, total MRP in 2019/20 is estimated to be £1.1m (including £0.3m PFI and finance leases).

3.0 CURRENT TREASURY POSITION

3.1 The Authority's treasury portfolio position at 31st December 2019 consisted of:

		31st December 2019	
		Principal	Average
		Outstanding	Interest Rate
		£m	%
External Debt			
Fixed Rate			
- PWLB		13.6	4.1
- Other Institutions		0	0.0
Variable Rate			
		0	0.0
		13.6	4.1
Cash Available			
- Invested short term with NYCC		6.8	0.9
- Current Accounts		0.0	0.0
		6.8	0.9

5.0 BORROWING STRATEGY

5.1 In practical terms the policy is to finance capital expenditure by borrowing from the Public Works Loan Board. Whilst individual loans have in the past been linked to the cost of specific capital assets or their useful life span, in future, loans will be taken out over varying periods depending on the perceived relative value of interest rates at the time of borrowing and the need to avoid a distorted loan repayment profile. To date, all Authority external borrowing is with PWLB.

5.2 There are a range of options available to the Authority for the borrowing strategy in 2020/21:

- (a) Internal borrowing achieved by running down cash balances and foregoing interest earned at historically low rates. Based on analysis, this continues to be the cheapest borrowing. However, in view of the overall forecast for long term borrowing rates to increase over the next few years, consideration will also be given to weighing the short term advantage of internal borrowing against potential long term costs if the opportunity is missed for taking PWLB or market loans at long term rates which will be higher in future years;
- (b) PWLB rates are expected to gradually increase throughout the financial year so it would be advantageous to time any new external borrowing earlier in the year.

5.3 One of the annual principal factors in increases in revenue costs relate to Capital Financing charges. The provision for debt repayment (otherwise known as the Minimum Revenue Provision or MRP) is a statutory calculation, whilst external interest payments are due under loan agreements with external borrowers. These sums are the product of past and future assumed borrowing.

Borrowing rates

5.4 Borrowing interest rates were on a downward trend during the first half of 2019/20 but then jumped up unexpectedly by 1% on 09/10/2019 due to a policy change by the Government. The policy of avoiding new borrowing by running down spare cash balances has served the

Authority well over the last few years. However, the unexpected increase of 1% in PWLB rates requires further consideration to be given to this policy to ensure it continues to provide the best long term solution for the PFCC FRA.

- 5.5 The gap between longer term borrowing rates and investment rates has now materially widened, and in the long-term Bank Rate is not expected to rise above 2.5%.

External v Internal Borrowing

- 5.4 The Authority has undertaken internal borrowing of £1,870,000 to 31st March 2019 and is planning further internal borrowing of £1,569,000 in respect of the 2019/20 capital programme. This option is possible because of the Authority's cash balance with a daily average of £7,800,000 between the 1st April and 31st December 2019. This consists of cash flow generated (e.g. creditors), core cash (e.g. reserves, balances and provisions) and cash built up through minimum revenue provision due to most debt outstanding being on a maturity basis. Repayment of maturing debt of £372,000 is due in 2020/21.

- 5.5 In considering the use of the internal borrowing option, two significant risks taken into account are:

- (a) The implications of day to day cash constraints, and;
- (b) Short term saving by avoiding / delaying new long term borrowing in 2020/21 must be weighed against the loss of longer term interest rate stability. Thus, there is the potential for incurring long term extra costs by delaying unavoidable new external borrowing until later years by which PWLB long term borrowing rates are forecast to be significantly higher.

- 5.6 The general strategy for this "Internal Capital Financing" option will therefore be to actively consider this approach annually. However, this policy will be carefully reviewed and monitored on an on-going basis.

6.0 POLICY ON BORROWING IN ADVANCE OF NEED

- 6.1 The Authority will not borrow more than or in advance of its needs purely in order to profit from the investment of the extra sums borrowed. Any decision to borrow in advance will be within forward approved Capital Financing Requirement estimate and will be considered carefully to ensure that value for money can be demonstrated and that the Authority can ensure the security of such funds.

Borrowing in advance will be made within the constraints that:

- (a) there is a clear business case for doing so for the current Capital Plan;
- (b) it will be used to finance future debt maturity repayments;
- (c) it will offer value for money can be demonstrated; and
- (d) the County Council can ensure the security of such funds which are subsequently invested

- 6.2 Risks associated with any borrowing in advance activity will be subject to prior appraisal and subsequent reporting through the mid-year or annual reporting mechanism.

7.0 REVIEW OF LONG-TERM DEBT AND DEBT RESCHEDULING

7.1 The rescheduling of debt involves the early repayment of existing debt and its replacement with new borrowing. This can result in one off costs, or benefits, called respectively premiums and discounts. These occur when the rate of the loan repaid varies from comparative current rates. Where the interest rate of the loan to be repaid is higher than current rates, a premium is charged by the PWLB for repayments. Where the interest rate of the loan to be repaid is lower than the current rate, a discount on repayment is paid by the PWLB.

Premature repayment of External Debt

7.2 Rescheduling of current borrowing in our debt portfolio is unlikely to occur as the 100 bps increase in PWLB rates only applied to new borrowing rates and not to premature debt repayment rates.

7.3 No early debt repayment or rescheduling exercises have been affected to date nor are proposed in 2019/20. Higher rate historical rate borrowing continues to be cheaper compared with current repayment premiums and interest rates. The situation will continue to be monitored to identify any opportunities for the Authority's debt portfolio that may arise. Such opportunities, however, are limited in the current economic climate.

8.0 ANNUAL INVESTMENT STRATEGY

8.1 By virtue of the Service Level Agreement with North Yorkshire County Council, the Authority has adopted the Annual Investment Strategy of the Council which is embedded within the terms of the agreement and within the services which the Council provides on the Authority's behalf. NYCC's Annual Treasury Management and Investment Strategy for 2020/21 was approved on 28th February 2020.

8.2 The net return/cost achieved by the County Council is monitored by the Authority's Chief Officer to ensure it does not diverge materially from the budgeted amount.

8.3 Within the terms of the contract the County Council continues to make all investments in accordance with the Local Government Act 2003. The County Council's Investment Strategy has regard to the following:

- MHCLG's Guidance on Local Government Investments (the Guidance)
- CIPFA Treasury Management in Public Services Code of Practice and Cross Sectoral Guidance Notes 2017 (the Code)
- CIPFA Treasury Management Guidance Notes 2018

8.4 The above guidance from the MHCLG and CIPFA place a high priority on the management of risk. The County Council has adopted a prudent approach to managing risk and defines its risk appetite by the following means:

- a) minimum acceptable credit criteria are applied in order to generate a list of highly creditworthy counterparties. This also enables diversification and thus avoidance of concentration risk. The key ratings used to monitor counterparties are the short term and long-term ratings;
- b) other information: ratings will not be the sole determinant of the quality of an institution; it is important to continually assess and monitor the financial sector on both a micro and macro basis and in relation to the economic and political environments in which

institutions operate. The assessment will also take account of information that reflects the opinion of the markets. To achieve this consideration, the County Council will engage with its advisors to monitor market pricing such as “credit default swaps” and overlay that information on top of the credit ratings;

- c) other information sources used will include the financial press, share price and other such information pertaining to the financial sector in order to establish the most robust scrutiny process on the suitability of potential investment counterparties;
- d) the County Council has defined the list of types of investment instruments that the treasury management team are authorised to use: -
 - **Specified investments** are those with a high level of credit quality and subject to a maturity limit of one year.
 - **Non-specified investments** are those with less high credit quality, may be for periods in excess of one year, and/or are more complex instruments which require greater consideration by officers before being authorised for use. Once an investment is classed as non-specified, it remains non-specified all the way through to maturity i.e. an 18 month deposit would still be non-specified even if it has only 11 months left until maturity.
- e) **Non-specified investments limit.** The County Council has determined that it will limit the maximum total exposure to non-specified investments as being 20% of the total investment portfolio, (£40m).
- f) **Lending limits**, (amounts and maturity), for each counterparty will be set.
- g) the County Council will set a limit for its investments which are invested for **longer than 365 days**.
- h) investments will only be placed with counterparties from countries with a specified minimum **sovereign rating**.
- i) the County Council has engaged **external consultants**, to provide expert advice on how to optimise an appropriate balance of security, liquidity and yield, given the risk appetite of the County Council in the context of the expected level of cash balances and need for liquidity throughout the year; and
- j) all investments will be denominated in **sterling**.

8.5 The County Council will also pursue value for money in treasury management and will monitor the yield from investment income against appropriate benchmarks for investment performance. Regular monitoring of investment performance will be carried out during the year.

Creditworthiness Policy

8.6 The County Council applies the creditworthiness service provided by Link Asset Services. This service employs a sophisticated modelling approach utilising credit ratings from the three main credit rating agencies - Fitch, Moody's and Standard & Poor's. The credit ratings of counterparties are supplemented with the following overlays:

- “watches” and “outlooks” from credit rating agencies.
- CDS spreads that may give early warning of likely changes in credit ratings.
- sovereign ratings to select counterparties from only the most creditworthy countries.

This modelling approach combines credit ratings, and any assigned Watches and Outlooks in a weighted scoring system which is then combined with an overlay of CDS spreads. The product of this is a series of colour coded bands which indicate the relative creditworthiness of counterparties. These colour codes are used by the County Council to determine the suggested duration for investments.

- 8.7 All credit ratings will be monitored daily. The County Council is alerted to changes to ratings of all three agencies through its use of the Link Asset Services' creditworthiness service.
- 8.8 If a downgrade results in the counterparty / investment scheme no longer meeting the County Council's minimum criteria, its further use as a new investment will be withdrawn immediately.
- 8.9 In addition to the use of credit ratings the County Council will be advised of information in movements in Credit Default Swap spreads against the iTraxx European Financials benchmark and other market data on a daily basis via its Passport website, provided exclusively to it by Link Asset Services. Extreme market movements may result in downgrade of an institution or removal from the County Council's lending list.
- 8.10 Sole reliance will not be placed on the use of this external service. In addition, the County Council will also use market data and market information, as well as information on any external support for banks to help support its decision making process.

9.0 OTHER TREASURY MANAGEMENT ISSUES

The scheme of delegation and role of the section 151 officer in relation to Treasury Management

- 9.1 The Government's Investment Guidance requires that a local authority includes details of the Treasury Management schemes of delegation and the role of the Chief Financial Officer in the Annual Treasury Management/Investment Strategy.
- 9.2 The key elements of delegation in relation to Treasury Management are set out in Section 5.7 the Service's Financial Regulations within its Corporate Governance Framework.

Arrangements for Reporting

- 9.3 Current reporting arrangements for the reporting of Treasury Management activities comprise the receipt by the Police, Fire and Crime Commissioner of an Annual Strategy and plan in advance of the year. The PFCC will receive as a minimum, a mid-year review and an annual report after its close.

APPROVED LENDING LIST 2020/21

Maximum sum invested at any time (The overall total exposure figure covers both Specified and Non-Specified investments)

	Country	Specified Investments (up to 1 year)		Non-Specified Investments (> 1 year £40m limit)

NORTH YORKSHIRE POLICE, FIRE & CRIME COMMISSIONER (FIRE & RESCUE AUTHORITY)

CAPITAL STRATEGY

1.0 BACKGROUND

1.1 The purpose of the Capital Strategy is to demonstrate that the Authority takes capital expenditure and investment decisions in line with corporate and service objectives and properly takes account of stewardship, value for money, prudence, sustainability and affordability. It sets out the long term context in which capital expenditure and investment decisions are made and gives due consideration to both risk and reward and impact on the achievement of priority outcomes.

1.2 The Capital Strategy comprises several distinct, but inter-related, elements as follows:

(a) Capital Expenditure (Paragraph 2)

This section includes an overview of the governance process for approval and monitoring of capital expenditure, including the Authority's policies on capitalisation, and an overview of its capital expenditure and financing plans.

(b) Capital Financing and Borrowing (Paragraph 3)

This section provides a projection of the Authority's capital financing requirement, how this is impacted by capital expenditure decisions and how it will be funded and repaid. It therefore sets out the Authority's borrowing strategy and explains how it will discharge its duty to make prudent revenue provision for the repayment of debt.

(c) Chief Finance Officer's statement (Paragraph 4)

This section contains the Chief Finance Officer's views on the deliverability, affordability and risk associated with the capital strategy

1.3 Alternative Investments

The prolonged low interest rate environment has resulted in reduced returns on treasury management investments. Moreover, the introduction of the general power of competence has given local authorities far more flexibility in the types of activity they can engage in. At the time of writing the Capital Strategy, there are no alternative investment activities that count as capital expenditure being considered by the Authority.

2.0 CAPITAL EXPENDITURE

Capitalisation Policy

2.1 Expenditure is classified as capital expenditure when it results in the acquisition or construction of an asset (e.g. land, buildings, vehicles, plant and equipment etc.) that:

- Will be held for use in the delivery of services, for rental to others, investment or for administrative purposes; and
- Are of continuing benefit to the Authority for a period extending beyond one financial year.

Subsequent expenditure on existing assets is also classified as capital expenditure if these two criteria are met.

2.2 There may be instances where expenditure does not meet this definition but would be treated as capital expenditure, including:

- Where the Authority has no direct future control or benefit from the resulting assets, but would treat the expenditure as capital if it did control or benefit from the resulting assets; and
- Where statutory regulations require the Authority to capitalise expenditure that would not otherwise have expenditure implications according to accounting rules.

2.3 The Authority operates a de-minimis limit for capital expenditure of £10,000. This means that items below these limits are charged to revenue rather than capital.

Governance

2.4 Capital expenditure is a necessary element in the development of the Authority's services since it generates investment in new and improved assets. Capital expenditure is managed through the five year Capital Programme - reviewed annually as part of the budget setting process and reviewed in year as part of financial monitoring arrangements.

2.5 The Authority's Code of Corporate Governance provides a framework for the preparation and appraisal of schemes proposed for inclusion in the Capital Plan, appropriate authorisations for individual schemes to proceed and facilitate the overall management of the Capital Programme within defined resource parameters.

2.6 The Chief Finance Officer shall determine the format of the Capital Programme and the timing of reports relating to it. The approved Capital Programme will comprise several individual schemes each of which will be quantified on an annualised basis. Relevant Budget Holders will prepare a draft Capital Programme, in consultation with the Chief Finance Officer, for submission to the PFCC. The Capital Programme should identify planned expenditure, and funding, at proposed individual scheme or project level.

2.7 The Chief Finance Officer is responsible for preparing an overall Capital Programme for consideration and approval by the PFCC, the funding of which being compatible always with the Treasury Management Policy Statement of the Authority. Individual schemes shall only be included in the Capital Plan following a project appraisal process undertaken in accordance with the Code of Corporate Governance.

Capital Expenditure and Funding Plans

2.8 The Authority's capital expenditure plans as per the Capital Programme are set out in **Appendix B Paragraph 1.6(i)**.

2.9 When expenditure is classified as capital expenditure for capital financing purposes, this means that the Authority can finance that expenditure from any of the following sources:

- (a) **Capital grants and contributions** - amounts awarded to the Authority in return for past or future compliance with certain stipulations.

- (b) **Capital receipts** - amounts generated from the sale of assets and from the repayment of capital loans, grants or other financial assistance.
- (c) **Revenue contributions** - amounts set aside from the revenue budget in the Reserve for Future Capital Funding.
- (d) **Borrowing** - amounts that the Authority does not need to fund immediately from cash resources, but instead charges to the revenue budget over several years into the future.

2.10 The implications of financing capital expenditure from 'borrowing' are explained in section 3 below.

3.0 CAPITAL FINANCING REQUIREMENT AND BORROWING

Context

- 3.1 The Authority is required to comply with the CIPFA Prudential Code for Capital Finance in Local Authorities (referred to as the 'Prudential Code') when assessing the affordability, prudence and sustainability of its capital investment plans.
- 3.2 Fundamental to the prudential framework is a requirement to set a series of prudential indicators. These indicators are intended to collectively build a picture that demonstrates the impact over time of the Authority's capital expenditure plans upon the revenue budget and upon borrowing and investment levels, and explain the overall controls that will ensure that the activity remains affordable, prudent and sustainable.
- 3.3 A summary of the actual prudential indicators for 2018/19, and the estimates for 2019/20 through to 2022/23, are provided in **Appendix B Paragraph 1**.

Capital Financing Requirement (CFR)

- 3.4 When capital expenditure is funded from borrowing, this does not result in expenditure being funded immediately from cash resources but is instead charged to the revenue budget over several years. It does this in accordance with its policy for the repayment of debt, which is set out in **Appendix B Paragraph 2**.
- 3.5 The forward projections of the CFR reflect:
 - Additional capital expenditure from borrowing or further credit arrangements resulting in an increase to the CFR and
 - Revenue budget provision being made for the repayment of debt, which results in a reduction to the CFR.

3.6 The actual CFR for 2018/19 and forward projections for the current and forthcoming years are as follows:

	2018/19	2019/20	2020/21	2021/22	2022/23
	Actual	Estimate	Estimate	Estimate	Estimate
	£000	£000	£000	£000	£000
Opening Capital Financing Requirement	16,856	16,826	17,187	18,205	18,976
Unsupported Borrowing to fund Capital Exp.	1,424	1,569	2,147	1,949	2,019
Minimum Revenue Provision:					
Supported Borrowing	-265	-255	-245	-235	-300
Unsupported Borrowing	-533	-569	-577	-657	-785
PFI and Finance Leases	-655	-384	-308	-287	-238
Closing Capital Financing Requirement	16,826	17,187	18,205	18,976	19,671

3.7 CFR increases are dependent on the level of capital investment and external borrowing undertaken.

External Borrowing Limits

3.8 The Authority is only permitted to borrow externally (including via credit arrangements) up to the level implied by its Capital Financing Requirement (CFR). To ensure that external borrowing does not exceed the CFR, other than in the short term, limits are established for external debt, as follows:

- (a) The **Authorised Limit** which represents the limit beyond which borrowing is prohibited and needs to be set and revised by the PFCC. Borrowing beyond this limit would be ultra vires. The provision of temporary borrowing allows for temporary short term borrowing in year to allow for cash flow movements.
- (b) The **Operational Boundary** which is based on the probable external debt during the year. It includes scope for borrowing for revenue purposes that may be required in the short term during the year, if for instance a large grant payment was delayed.

The proposed limits, which are set out in **Appendix B Paragraph 1.6**, make separate provision for external borrowing and other long-term liabilities, and are based upon an estimate of the most likely but not worst-case scenarios. They allow sufficient headroom for fluctuations in the level of cash balances and in the level of the CFR.

The agreed **Operational Boundary** and **Authorised Limits** for external debt are as follows:

Authorised Limit for External Debt			2019/20	2020/21	2021/22	2022/23
			Estimate	Estimate	Estimate	Estimate
			£000	£000	£000	£000
Borrowing			12,610	14,384	15,961	17,586
PFI and Finance Leases			2,311	2,003	1,717	1,478
Provision for Temporary Borrowing			2,500	2,500	2,500	2,500
Net Borrowing			17,421	18,888	20,178	21,564
Operational Boundary for External Debt						
			Estimate	Estimate	Estimate	Estimate
			£000	£000	£000	£000
Borrowing			12,610	14,384	15,961	17,586
PFI and Finance Leases			2,311	2,003	1,717	1,478
Provision for Temporary Borrowing			1,500	1,500	1,500	1,500
Net Borrowing			16,421	17,888	19,178	20,564

Borrowing Strategy

- 3.9 The Authority's Borrowing Strategy is set out in **Appendix B Paragraph 5**.
- 3.10 The Authority is forecast, from 1st April 2019, to be in an under borrowed position. This means that the Capital Financing Requirement (CFR) has not been fully funded from long-term external borrowing as cash supporting the Authority's reserves and balances has been used as a short term measure.
- 3.11 The use of internal borrowing has been an effective strategy in recent years as:
- It has enabled the Authority to avoid significant external borrowing costs; and
 - It has mitigated significantly the risks associated with investing cash in what has often been a volatile and challenging market.
- 3.12 The internal borrowing position will be carefully reviewed and monitored on an ongoing basis in order to consider any changes to borrowing rates as well as current and future cash flow constraints.
- 3.13 The external borrowing requirement will also be kept under review, and long term external loans will be secured within the parameters established by the authorised limit and operational boundary for external debt.
- 3.14 Further long term external borrowing may be undertaken, in excess of the current forecasts, in the event that it is not possible or desirable to sustain the anticipated internal borrowing position.
- 3.15 Opportunities to generate savings by refinancing or prematurely repaying existing long term debt will also be kept under review. Potential savings will be considered in the light of the current treasury position and the costs associated with such actions.

Minimum Revenue Provision

- 3.16 The Authority sets cash resources aside from the Revenue Budget each year to repay the borrowing. This practice is referred to as the minimum revenue provision (MRP) for the repayment of debt.

- 3.17 The Capital Financing Requirement (CFR) provides a measure of the amount of capital expenditure which has been financed from borrowing that the Authority has yet to fund from cash resources.
- 3.18 Statutory guidance requires MRP to be provided annually on a prudent basis. In accordance with the requirement to make a prudent 'revenue provision for the repayment of debt', the Authority ensures that debt is repaid over a period that is commensurate with the period over which the capital expenditure provides benefit. The revenue budget provision for MRP charges in 2020/21 has been compiled on a basis consistent with this policy.

4.0 CHIEF FINANCE OFFICER STATEMENT

Background

- 4.1 The Prudential Code for Capital Finance in Local Authorities (the Prudential Code) plays a key role in capital finance in local authorities. Local authorities determine their own programmes for investment that are central to the delivery of quality public services. The Prudential Code was developed by CIPFA as a professional code of practice to support local authorities in taking their decisions. Local authorities are required by regulation to have regard to the Prudential Code when carrying out their duties under Part 1 of the Local Government Act 2003.
- 4.2 In financing capital expenditure, local authorities are governed by legislative frameworks, including the requirement to have regard to CIPFA's Treasury Management in the Public Services: Code of Practice and Cross-Sectoral Guidance Notes.
- 4.3 In order to demonstrate that capital expenditure and investment decisions are taken in line with service objectives and properly take account of stewardship, value for money, prudence, sustainability and affordability, the Prudential Code requires authorities to have in place a Capital Strategy that sets out the long term context in which capital expenditure and investment decisions are made, and gives due consideration to both risk and reward and impact on the achievement of priority outcomes.
- 4.4 The Prudential Code requires the Chief Finance Officer to report explicitly on the affordability and risk associated with the Capital Strategy. The following are specific responsibilities of the Section 151 Officer:
- recommending clauses, treasury management policy/practices for approval, reviewing regularly, and monitoring compliance.
 - submitting treasury management reports.
 - submitting capital budget reports.
 - reviewing the performance of the treasury management function.
 - ensuring the adequacy of treasury management resources and skills, and the effective division of responsibilities within the treasury management function.
 - ensuring the adequacy of internal audit and liaising with external audit.
 - recommending the appointment of external service providers.
 - preparation of a capital strategy to include capital expenditure, capital financing, non-financial investments and treasury management

- ensuring that the capital strategy is prudent, sustainable, affordable and prudent in the long term and provides value for money
- ensuring that due diligence has been carried out on all treasury and non-financial investments and is in accordance with the risk appetite of the Authority
- ensure that the Authority has appropriate legal powers to undertake expenditure on non-financial assets and their financing
- ensuring the proportionality of all investments so that the Authority does not undertake a level of investing which exposes the Authority to an excessive level of risk compared to its financial resources
- ensuring that an adequate governance process is in place for the approval, monitoring and ongoing risk management of all non-financial investments and long term liabilities
- provision to the PFCC of a schedule of all non-treasury investments including material investments in subsidiaries, joint ventures, loans and financial guarantees
- ensuring that the PFCC is adequately informed and understand the risk exposures taken on by the Authority
- ensuring that the Authority has adequate expertise, either in house or externally provided
- creation of Treasury Management Practices which specifically deal with how non treasury investments will be carried out and managed.
