- In the 18 months from Jan 14 we have gone from having no dedicated HBPoS to now having 4, resulting in the majority of those detained under 136 being diverted away from custody.
- For the same period last year (Jan 14 to Jun 14) there has been a 28% drop in the use of custody as a place of safety.
- All instances where custody is used as the primary place of safety are scrutinised to examine why custody was used and this is discussed with partners in health.
- During May-15 a 17 year old girl was detained in police custody – this was due to her aggressive behaviour which posed a risk to herself and others.
