

TRANSFORMING FRENSICS

‘A once in a generation opportunity?’

ACO Jo Ashworth OBE

Programme Director

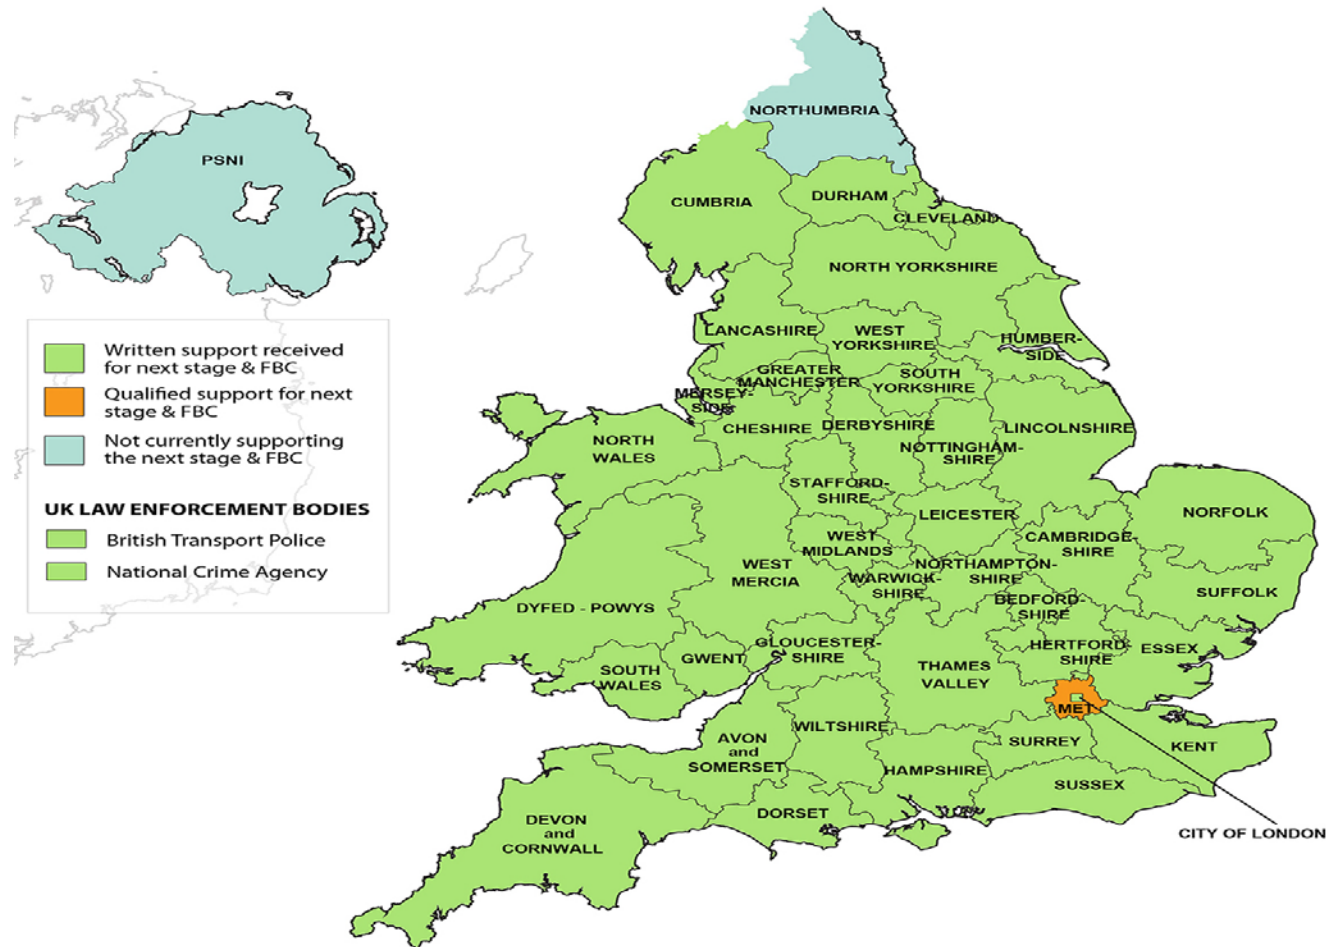

When we last met we....

- Talked about aligning our vision to the Policing 2025 Vision:

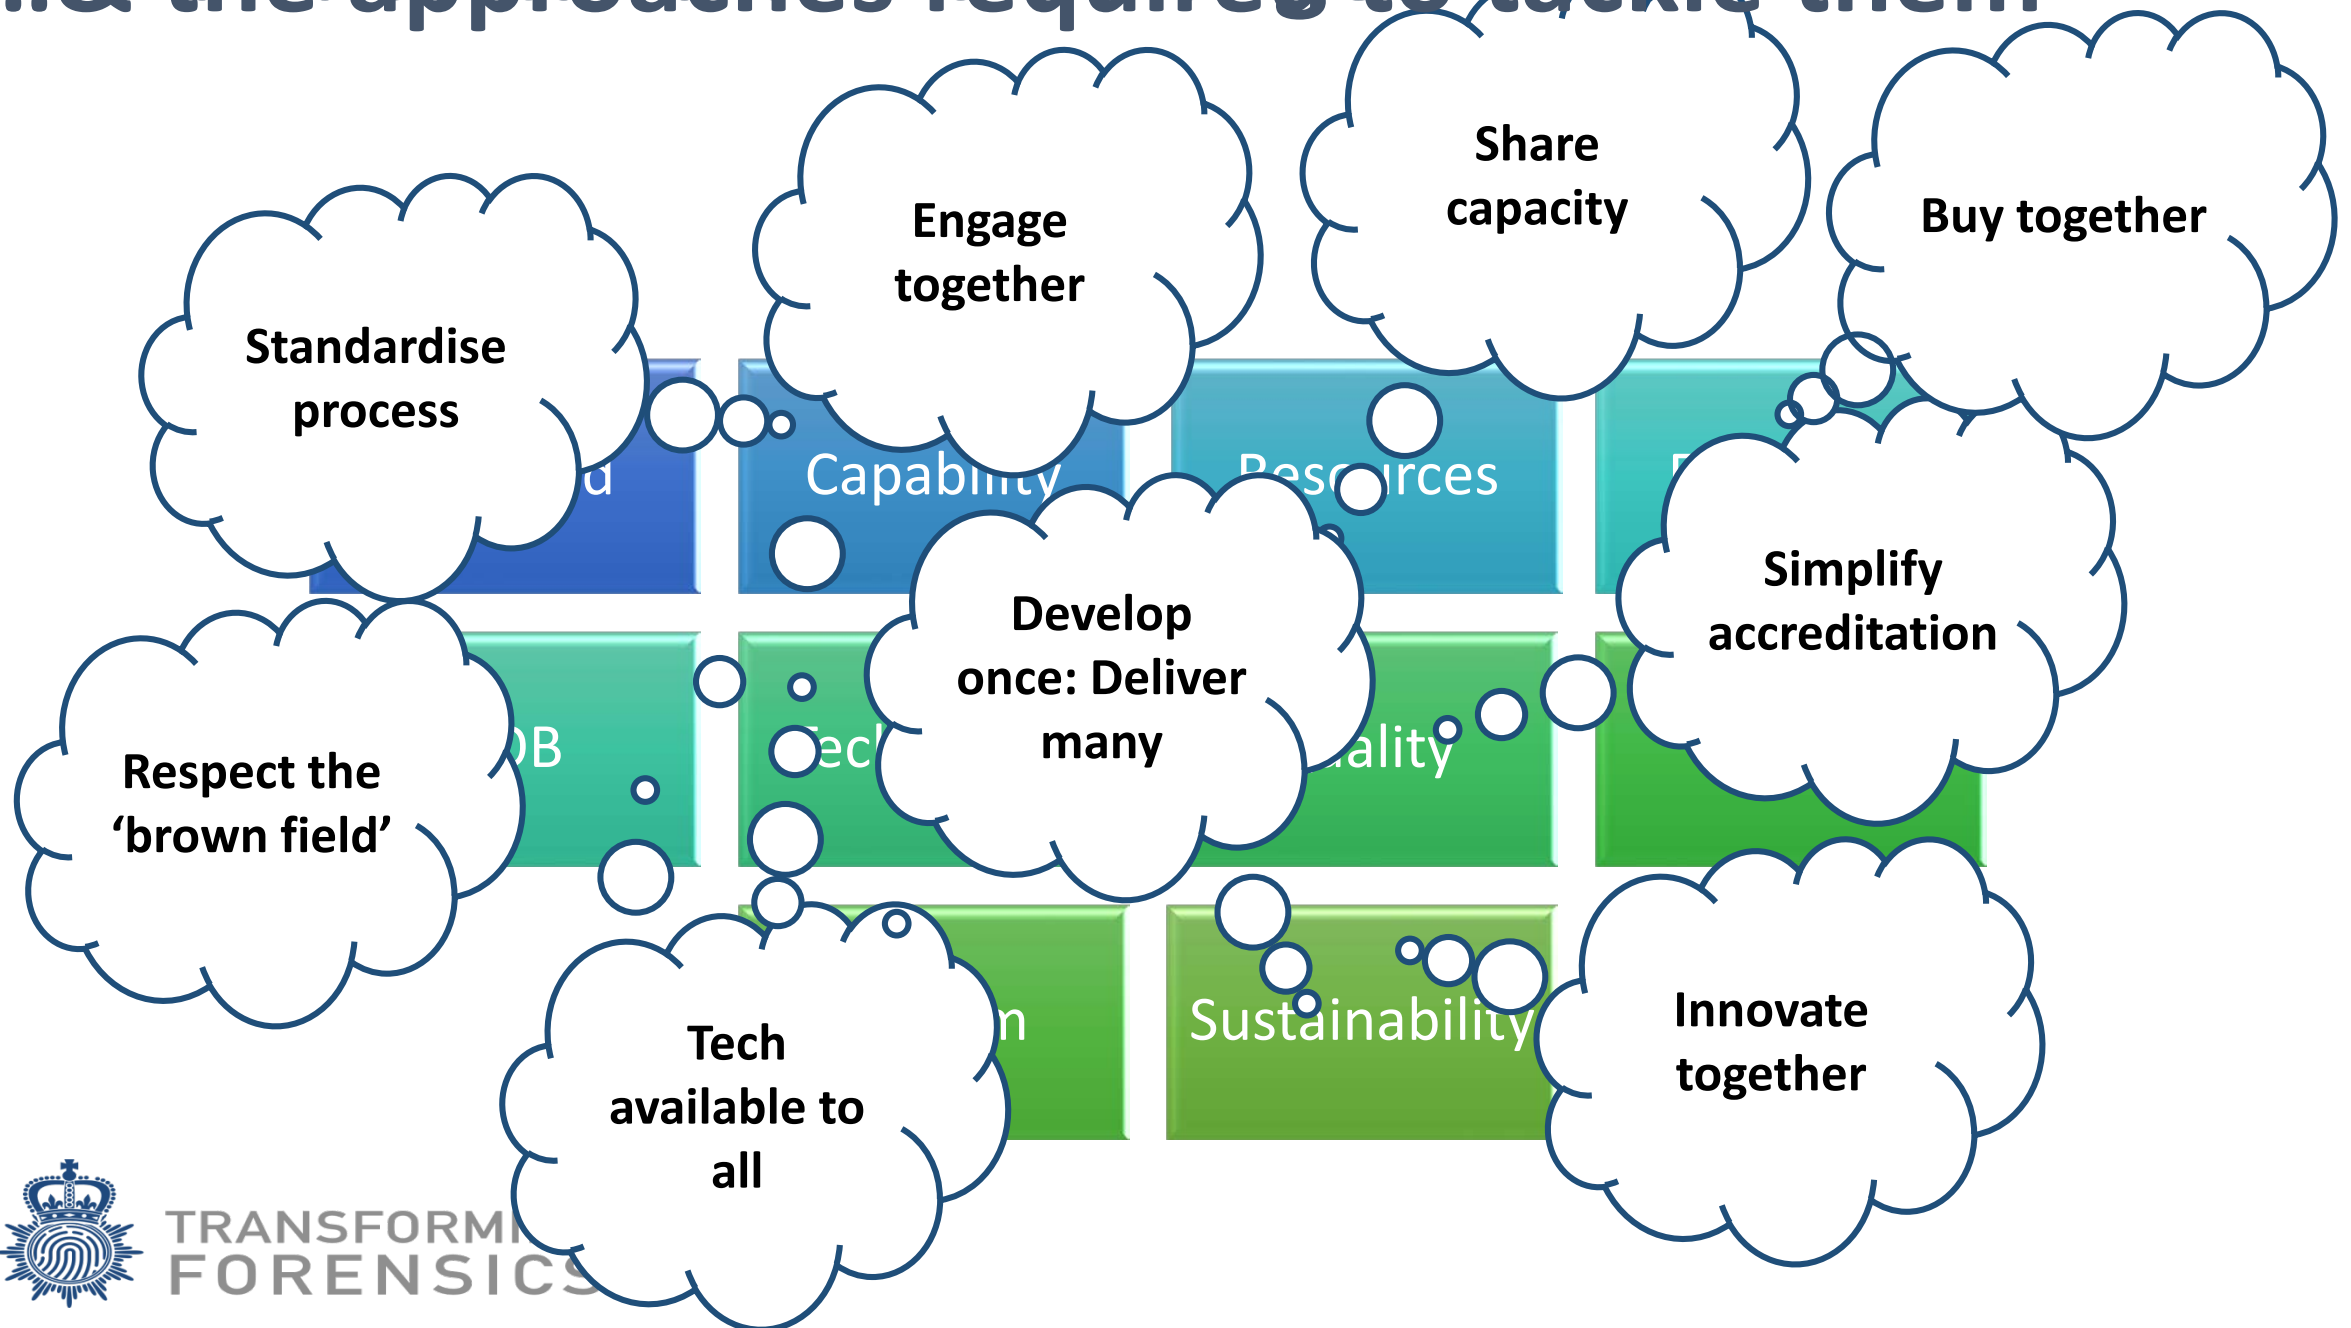

- Discussed the challenges we are trying to address
- Laid out how we were going to take on board your feedback in shaping our approach
- Asked you to help us shape the next phase

Unprecedented force support

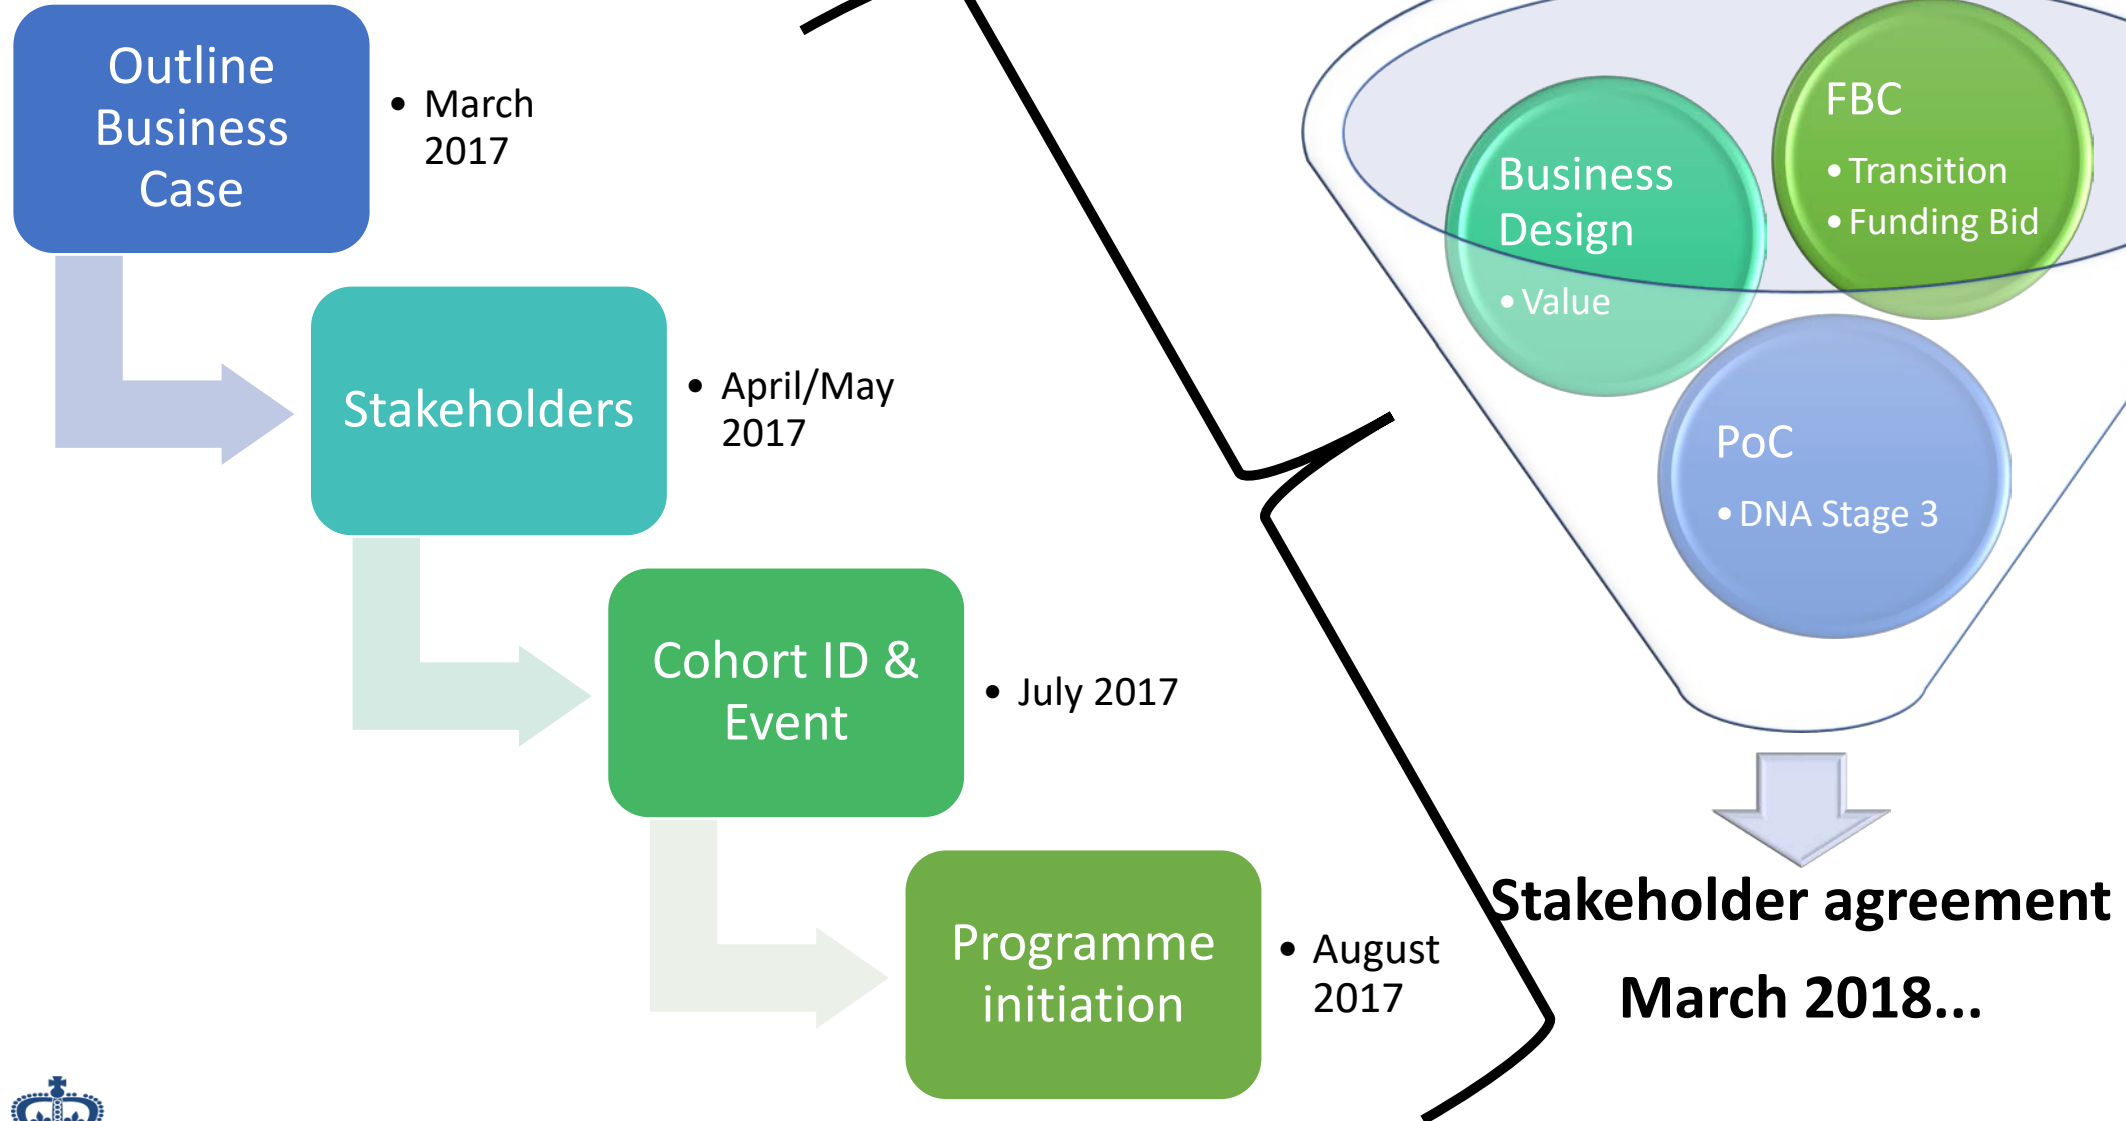

TRANSFORMING
FORENSICS

Use the approach the requires to tackle them

We've been working hard

TRANSFORMING
FORENSICS

Maintaining the long term vision

- A complex programme with long term benefits & savings
- But with tangible short term, local deliverables :
 - Fingerprint service transformation
 - Digital Forensics
 - Quality Accreditation
 - Next generation DNA

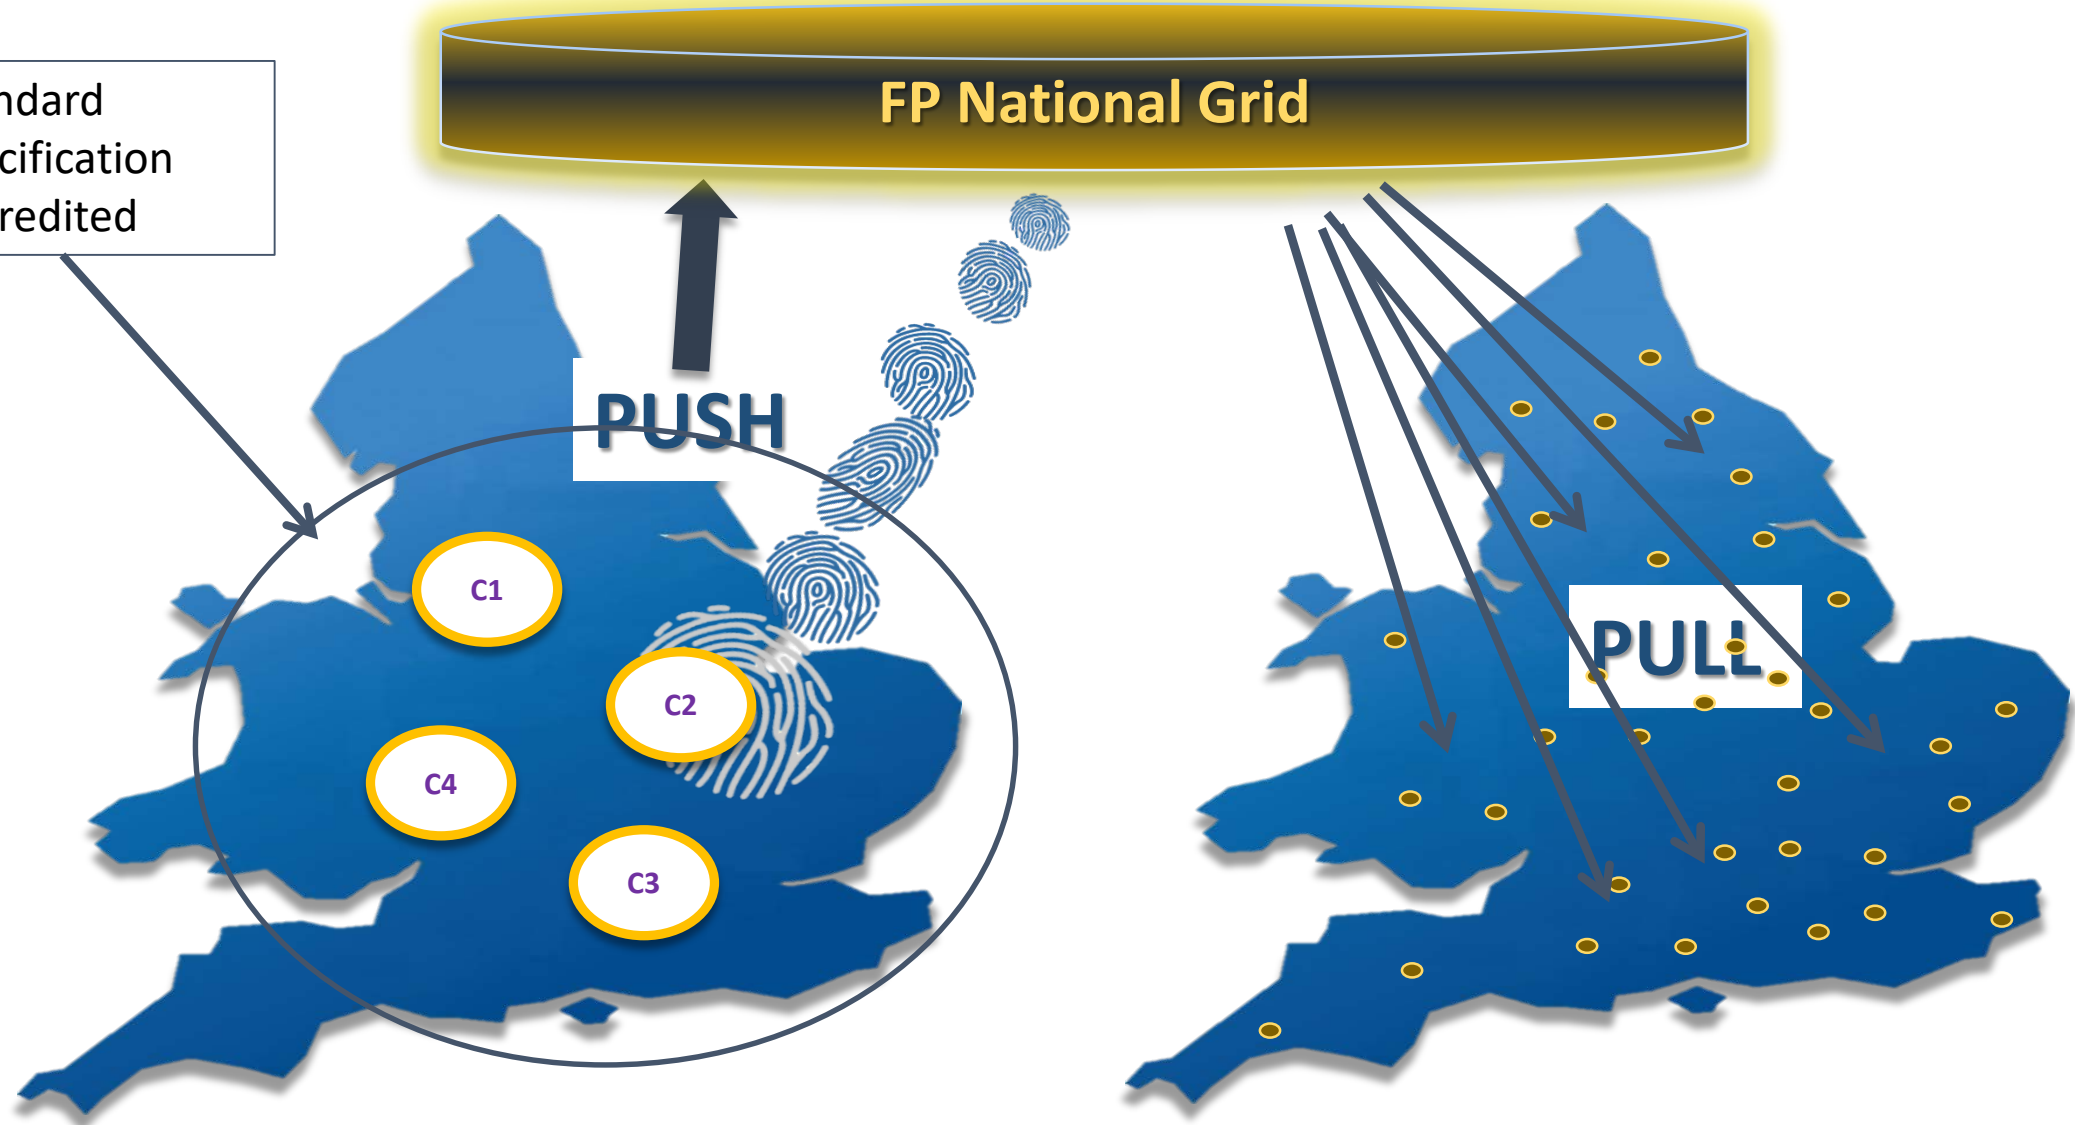

The Proposition

- **Networked forensic capabilities**; making better use of what already exists through collaboration or full integration
- TF procures and manages the '**national grid**' and provides centralised quality and accreditation services and support
- Manages strategy, requirements and innovation and coordinates change

Identifying Pathfinder Forces to lead the first wave of services & problem solve

What do we mean??

- Standard specification
- Accredited

TRANSFORMING
FORENSICS

Next steps

- PRTB submission on 24th November
- 6th December – PRTB ‘airing’
- Late January bid consideration
- Programme business case in Jan with ‘ready reckoners’ for forces
- Late January - Chiefs Council & APCC General meeting
- Force consideration
- April onwards.....

A reminder of benefits

Improved services to the victims of crime

Increase CSI scenes per day

Consistency

Managing risk
Releasing efficiencies for reinvestment

Driving costs down
and quality up

Efficiency

Improved investigations & speedier justice
Tackling changing nature of crime

Improved capability &
new services

Capability
