# NORTH YORKSHIRE POLICE, FIRE AND CRIME COMMISSIONER (FIRE & RESCUE AUTHORITY)

## **EXECUTIVE BOARD**

#### **Report of the Chief Finance Officer**

#### 22nd February 2022

#### TREASURY MANAGEMENT

#### 1.0 <u>Purpose of Report</u>

- 1.1 To present an updated Annual Treasury Management Strategy for the financial year 2022/23 which incorporates:
  - a) the Annual Investment Strategy.
  - b) Capital and Treasury Prudential Indicators, including a Minimum Revenue Provision Policy; and
  - c) a Capital Strategy

#### 2.0 Background

- 2.1 The Authority is required to operate a balanced budget, which broadly means that cash raised during the year will meet cash expenditure. Part of the treasury management operation is to ensure that this cash flow is adequately planned, with cash being available when needed.
- 2.2 The second main function of the treasury management service is the funding of the Authority's capital plans. These capital plans provide a guide to the borrowing need of the Authority, essentially the longer-term cash flow planning, to ensure that the Authority can meet its capital spending obligations. This management of longer-term cash may involve arranging long or short-term loans or using longer term cash flow surpluses. On occasion, any debt previously drawn may be restructured to meet Authority risk or cost objectives.

#### 2.3 CIPFA defines treasury management as: "The management of the local authority's investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks."

- 2.4 North Yorkshire County Council currently provides most of the Authority's Treasury Management arrangements under the terms of the Service Level Agreement. Under this agreement the County Council is required to comply with the terms of the Authority's approved Annual Treasury Management Policy Statement and Annual Treasury Management and Investment Strategy. This includes providing advice to the Authority on any necessary changes required at the time of annually updating these documents.
- 2.5 Internal cash balances are invested in low-risk counterparties or instruments commensurate with the County Council's low risk appetite, providing adequate liquidity initially before considering investment return.

- 2.6 The Authority is currently forecasting year end cash balances in the order of £4,000,000 at 31<sup>st</sup> March 2022. Depending on the timing of cash flows of receipts and payments throughout the year, balances available for investment daily are likely to increase to between £10,000,000 and £12,000,000 at points throughout 2022/23. The magnitude of these sums available for investment reinforces the importance of having robust Treasury Management strategies and polices.
- 2.7 Current reporting arrangements for the reporting of Treasury Management activities comprise the receipt by the Police, Fire and Crime Commissioner (PFCC) of an Annual Strategy and plan in advance of the year. The PFCC will receive as a minimum, a mid-year review and an annual report after its close.
- 2.8 The Executive Board considered the Authority's Treasury Management mid-year review at its meeting on 25th January 2022.
- 2.9 The Capital Programme is regularly reviewed and there continues to be acknowledgement that there are significant areas of the Fire Estate and the equipment used within the service that require update. The current draft programme includes an estimate of works due to the results of the EDI surveys reported to Executive Board in November 2020 with some work now slipping into 2022/23 due to delays in the Architects providing the full specification causing the whole project to slip.
- 2.10 New station builds at Malton, Scarborough and Northallerton are phased to be complete in 2026/27, 2027/28 and 2028/29 respectively to coincide with the end of the PFI contract in 2027 which will save some £300k per year. This can then be used to fund the MRP and interest costs of these new builds.
- 2.11 The programme will be kept under review as regards outcomes of the Risk and Resource Model reviews which are likely to impact on the priority order of schemes. Also, estimates of costs for new stations will be regularly revisited alongside any impact on the minor works programme. It is important to understand how quickly different elements of the programme of work can be undertaken to set against the funding available. As these plans develop, they will be shared with the PFCC.
- 2.12 There is also an increased focus on slippage of capital schemes moving into 2022/23. Slippage approved prior to February 2022 has been included within the Capital Programme. Any requests for further slippage will be subject to approval by the Chief Finance Officer on preparation of a full and separate business case.
- 2.13 Consideration has also been given to funding of the programme specifically:
  - (a) the use of internal borrowing (from cash balances) due to the current low level of interest rates and the differential between the cost of borrowing from PWLB and borrowing internally (i.e., the interest forgone by not investing the cash balances).
  - (b) A capital reserve was created in 2020/21 through revenue contributions to capital. The Authority continues to plan to borrow to fund Estates and Fleet expenditure with the reserve moving up and down in line with the Capital Plan to fund IT expenditure and other capital requirements. Over the period 2021/22 to 2025/26 it is planned to fund £3,485,000 of such expenditure from the reserve:

	2021/22	2022/23	2023/24	2024/25	2025/26
Earmarked Capital Reserve:	£000	£000	£000	£000	£000
1st April brought forward	400	3,025	1,755	1,025	625
Transfers to Reserve	3,085	0	0	0	0
Used to fund capital in year	-460	-1,270	-730	-400	-625
31st March carried forward	3,025	1,755	1,025	625	0

A borrowing strategy incorporating these elements reduces the rate of increase and the incidence of capital financing costs over the period 2022/23 and 2025/26 delivering financial savings for the Authority, whilst also mitigating credit risk through holding investments in the market.

# 3.0 Treasury Management Reporting

- 3.1 The Authority is currently required to receive and approve, as a minimum, three main treasury reports each year, which incorporate a variety of policies, estimates and actuals.
  - a) **Treasury Management Strategy** (this report) is forward looking and covers:
    - the capital plans, (including prudential indicators)
    - a minimum revenue provision (MRP) policy, (how residual capital expenditure is charged to revenue over time)
    - the treasury management strategy, (how the investments/borrowings are to be organised), including treasury indicators; and
    - an investment strategy, (the parameters on how investments are to be managed).
  - b) **A mid-year treasury management report** primarily a progress report providing an update on the capital position, amending prudential indicators as necessary, and whether any policies require revision.
  - c) An annual treasury outturn report a backward looking review document which provides details of a selection of actual prudential and treasury indicators and actual treasury operations compared to the estimates within the strategy.

## 4.0 <u>Annual Treasury Management Strategy and Investment Strategy and Minimum</u> <u>Revenue Provision Policy 2022/23</u>

- 4.1 The **CIPFA Prudential Code for Capital Finance in Local Authorities** (as updated in 2017) and the terms of the **Local Government Act 2003**, together with 'statutory' Government Guidance, establish further requirements in relation to treasury management matters, namely:
  - a) the approval, on an annual basis, of a set of **Prudential Indicators.** The prudential indicators will be set based on the Capital Plan included within the Medium-Term Financial Plan (MTFP) 2022/23 to 2025/26.
  - b) the approval, on an annual basis, of an **Annual Treasury Management Strategy**, an **Annual Investment Strategy**, an annual **Minimum Revenue Provision (MRP)** policy statement and a **Capital Strategy**
- 4.2 CIPFA published the updated Treasury Management and Prudential Codes on 20 December 2021. CIPFA has stated that there will be a soft introduction of the codes with local

authorities not being expected to have to change their Treasury Management Strategy Statement or Annual Investment Strategy reports for 2022/23: full implementation would be required for 2023/24.

4.3 The DLUHC has also commenced a consultation on amending MRP rules, with proposed changes to be in place for the financial year beginning 1 April 2023. It is not the government's intention that changes to MRP rules are applied retrospectively and any changes will therefore be reflected in the 2023/24 Treasury Management Strategy.

### 4.4 **Treasury Management Strategy 2022/23**

The Treasury Management strategy for 2022/23 covers two main areas:

#### a) Capital issues

- the capital expenditure plans and the associated prudential indicators; and
- the minimum revenue provision (MRP) policy.

#### b) Treasury management issues

- treasury indicators which limit the treasury risk and activities of the Authority
- the current treasury position
- prospects for interest rates
- the borrowing strategy
- policy on borrowing in advance of need
- debt rescheduling
- the investment strategy
- creditworthiness policy; and
- the policy on use of external service providers.

## 4.5 **Treasury Management Policy Statement (TMPS)**

- stating the Authority's policies, objectives, and approach to risk management of its Treasury Management activities
- a framework of suitable **Treasury Management Practices** (TMPs) setting out the way the Authority will seek to achieve the policies and objectives set out in (a) and prescribing how it will manage and control those activities. The Code recommends 12 TMPs.

The Treasury Management Policy Statement is attached as **Appendix A** and reflects only very minor changes for 2022/23.

#### 4.6 Annual Investment Strategy

By virtue of the Service Level Agreement with North Yorkshire County Council, the Authority has adopted the Annual Investment Strategy of the Council which is embedded within the terms of the agreement and within the services which the Council provides on the Authority's behalf.

The Government's guidance on the Annual Investment Strategy, updated in 2018, states that authorities can combine the Treasury Management Strategy Statement and Annual Investment Strategy into one report. The Authority has adopted this combined approach.

# 4.7 Minimum Revenue Provision Policy (MRP)

The Authority is required to determine the amount of MRP it considers prudent for each financial year. The MRP Policy is based on the Government's statutory guidance.

## 4.8 **Capital Strategy**

The aim of the capital strategy is to ensure that those in charge of governance, and Officers fully understand the overall long-term policy objectives and resulting capital strategy requirements, governance procedures and risk appetite. It includes:

- a high-level, long-term overview of how capital expenditure, capital financing and treasury management activity contribute to the provision of services.
- an overview of how the associated risk is managed; and
- the implications for future financial sustainability

The Capital Strategy is attached at **Appendix C**.

## 5.0 Approved Lending List

5.1 The current Approved Lending List is attached to this report as **Schedule A** to the Annual Treasury Management and Investment Strategy 2022/23 (**Appendix B**). The List, however, continues to be monitored on an ongoing basis and changes made as appropriate by the Corporate Director - Strategic Resources to reflect credit rating downgrades/upgrades, mergers or market intelligence and rumours that impact on the credit 'score' and colour coding.

#### 6.0 <u>Recommendations</u>

- 6.1 That the PFCC is asked to approve:
  - a) The Treasury Management Policy Statement as attached at Appendix A
  - b) the annual Treasury Management and Investment Strategy for 2022/23 as detailed in **Appendix B** and in particular:
    - (i) an authorised limit for external debt of £21.4m in 2022/23
    - (ii) an operational boundary for external debt of £20.3m in 2022/23
    - (iii) the Prudential and Treasury Indicators
    - (iv) a limit of 20% (estimated at £800,000) of the overall balances can be considered for longer term investments over 365 days subject to comparative yields on short term investments
    - (v) a Minimum Revenue Provision (MRP) policy for debt repayment to be charged to revenue in 2022/23 as set out in **paragraph 2**
    - (vi) the Capital Strategy as attached as **Appendix C**
    - (vii) the Chief Finance Officer report to the PFCC/Executive Board in respect of in year Treasury Management issues

# NORTH YORKSHIRE POLICE, FIRE AND CRIME COMMISSIONER (FIRE & RESCUE AUTHORITY)

## TREASURY MANAGEMENT POLICY STATEMENT

### 1.0 BACKGROUND

- 1.1 The Authority has adopted the **CIPFA Code of Practice on Treasury Management in the Public Services** as updated in 2017. This Code sets out a framework of operating procedures to reduce treasury risk and improve understanding and accountability regarding the Treasury position of the Authority.
- 1.2 The CIPFA Code of Practice on Treasury Management requires the Authority to adopt the following four clauses of intent:
  - (a) the Authority will create and maintain as the cornerstone for effective Treasury Management
    - (i) a strategic **Treasury Management Policy Statement** (TMPS) stating the policies, objectives, and approach to risk management of the Authority to its treasury management activities.
    - (ii) a framework of suitable **Treasury Management Practices** (TMPs) setting out the way the Authority will seek to achieve those policies and objectives and prescribing how it will manage and control those activities. The Code recommends 12 TMPs.
  - (b) receipt by the PFCC of an annual strategy and plan, in advance of the year. The organisation (Executive Board) will receive as a minimum, a mid-year review and an annual report after its close, in the form prescribed in the TMPs.
  - (c) the Authority maintains responsibility for the implementation and regular monitoring of its Treasury Management policies and practices and delegates the execution and administration of Treasury Management decisions to the Chief Finance Officer who will act in accordance with the Authority's TMPS, TMPs, as well as CIPFA's Standard of Professional Practice on Treasury Management.
  - (d) the Authority nominates the Chief Finance Officer to be responsible for ensuring effective scrutiny of the Treasury Management Strategies and Policies.
- 1.3 The **CIPFA Prudential Code for Capital Finance in Local Authorities** and the terms of the **Local Government Act 2003**, together with 'statutory' Government Guidance, establish further requirements in relation to treasury management matters, namely:
  - (a) the approval, on an annual basis, of a set of **Prudential Indicators** and
  - (b) the approval, on an annual basis, of an Annual Treasury Management Strategy, an Annual Investment Strategy, an annual Minimum Revenue Provision (MRP) policy statement and a Capital Strategy with an associated requirement that each is monitored on a regular basis with a provision to report as necessary both in-year and at the financial year end.

# 2.0 TREASURY MANAGEMENT POLICY STATEMENT (TMPS)

- 2.1 Based on the requirements detailed above, a TMPS stating the policies and objectives of the treasury management activities of the Authority is set out below.
- 2.2 The Authority defines the policies and objectives of the treasury management activities of the Authority as follows:
  - (a) the management of the Authority's investments and cash flows, its banking, money market and capital market transactions, the effective control of the risks associated with those activities, and the pursuit of optimum performance consistent with those risks.
  - (b) the identification, monitoring and control of risk will be the prime criteria by which the effectiveness of the treasury management activities will be measured. Accordingly, the analysis and reporting of treasury management activities will focus on their risk implications for the Authority and any financial instrument entered into to manage these risks; and
  - (c) effective treasury management will provide support towards the achievement of the business and service objectives of the Authority as expressed in the Corporate Plan. The Authority is committed to the principles of achieving value for money in treasury management, and to employing suitable comprehensive performance measurement techniques, within the context of effective risk management.
- 2.3 As emphasised in the Treasury Management Code of Practice, responsibility for risk management and control of Treasury Management activities lies wholly with the PFCC and all officers involved in Treasury Management activities are explicitly required to follow Treasury Management policies and procedures.

# 3.0 TREASURY MANAGEMENT PRACTICES (TMPs)

- 3.1 The CIPFA Code of Practice on Treasury Management requires a framework of Treasury Management Practices (TMPs) which:
  - (a) set out the way the Authority will seek to achieve the policies and objectives; and
  - (b) prescribe how the Authority will manage and control those activities.
- 3.2 A list of the 12 TMPs is as follows: -
  - TMP 1 Risk management
  - TMP 2 Performance measurement
  - TMP 3 Decision-making and analysis
  - TMP 4 Approved instruments, methods, and techniques
  - TMP 5 Organisation, clarity, and segregation of responsibilities, and dealing arrangements
  - TMP 6 Reporting requirements and management information arrangements
  - TMP 7 Budgeting, accounting, and audit arrangements

- TMP 8 Cash and cash flow management
- TMP 9 Money Laundering
- TMP 10 Training and qualifications
- TMP 11 Use of external service providers
- TMP 12 Corporate governance

# 4.0 PRUDENTIAL INDICATORS

- 4.1 The Code requires the Authority to set a range of Prudential Indicators for the next three years
  - (a) as part of the annual budget process, and
  - (b) before the start of the financial year

to ensure that capital spending plans are affordable, prudent, and sustainable.

4.2 The Prudential Code also requires appropriate arrangements to be in place for the monitoring, reporting and revision of Prudential Indicators previously set.

The required Prudential Indicators are as follows:-

- Capital Expenditure Actual and Forecasts
- estimated ratio of capital financing costs to the Net Revenue Budget
- Capital Financing Requirement
- Gross Debt and the Capital Financing Requirement
- authorised Limit for External Debt
- operational Boundary for External Debt
- Actual External Debt
- Maturity Structure of Borrowing
- Total Principal Sums Invested for periods longer than 365 days
- 4.3 The PFCC will approve the Prudential Indicators for a three-year period alongside the annual Revenue Budget/Medium Term Financial Strategy each year. The Indicators will be monitored during the year and revisions submitted as necessary.

# 5.0 ANNUAL TREASURY MANAGEMENT AND INVESTMENT STRATEGY

5.1 A further implication of the Local Government Act 2003 is the requirement for the Authority to set out its Treasury Management Strategy for borrowing and to approve an Annual

Investment Strategy (which sets out the County Council's policies for managing its investments and for giving priority to the security and liquidity of those investments).

- 5.2 The Government's guidance on the Annual Investment Strategy, updated in 2018, states that authorities can combine the Treasury Management Strategy Statement and Annual Investment Strategy into one report. The Authority has adopted this combined approach.
- 5.3 Further statutory Government guidance, last updated with effect from February 2018, is in relation to an authority's charge to its Revenue Budget each year for debt repayment. A Minimum Revenue Provision (MRP) policy statement must be prepared each year and submitted to the PFCC for approval before the start of the financial year.

#### 6.0 REVIEW OF THIS POLICY STATEMENT

6.1 A review of this Policy Statement and all associated documentation will be undertaken annually as part of the Revenue Budget process, together with a mid-year review and at such other times during the financial year as considered necessary by the Chief Finance Officer.

# NORTH YORKSHIRE POLICE, FIRE AND CRIME COMMISSIONER (FIRE & RESCUE AUTHORITY)

# ANNUAL TREASURY MANAGEMENT AND INVESTMENT STRATEGY 2022/23

### 1.0 PRUDENTIAL INDICATORS 2022/23 TO 2024/25

#### 1.1 **Prudential Indicators**

The Prudential Code requires authorities (including the PFCC) to self-regulate the affordability, prudence and sustainability of their capital expenditure and borrowing plans, by setting estimates and limits, and by publishing actuals, for a range of Prudential Indicators.

The key objectives of the Prudential Code are to ensure that:

- Capital expenditure plans are affordable, prudent, and sustainable
- Treasury Management decisions are taken in accordance with professional good practice and in full understanding of the risks involved and how these risks will be managed to levels that are acceptable.
- 1.2 The Code imposes on authorities clear governance procedures for setting and revising of Prudential Indicators and describes the matters to which an authority will have regard when doing so. This is designed to deliver accountability in taking capital financing, borrowing and Treasury Management decisions. A fundamental provision of the Prudential Code is that over the medium-term net borrowing will only be for a capital purpose.
- 1.3 Under the Code, individual authorities are responsible for deciding the level of their affordable borrowing, having regard to the Code. Under the Code, the PFCC is required to set a range of Prudential Indicators for the financial years 2022/23 to 2024/25.
- 1.4 The Code states that Prudential Indicators for Treasury Management should be considered together with the Annual Investment Strategy. The indicators reflect the Capital Plan, existing commitments and associated financing costs as included within the Medium-Term Financial Plan (MTFP) 2022/23 to 2025/26.

## 1.5 **Affordability**

The following indicators are required to assess the affordability of the capital investment plans. They provide an indication of the impact of the capital investment plans on overall PFCC finances. The PFCC is requested to approve the following:

# (i) Estimated ratio of capital financing costs to the net Revenue Budget

	2020/21	2021/22	2022/23	2023/24	2024/25
	Actual	Estimate	Estimate	Estimate	Estimate
	£000	£000	£000	£000	£000
Minimum Revenue Provision:					
PWLB Borrowing	823	810	974	1,316	1,525
Finance Lease	169	176	79	86	88
PFI	138	111	160	275	332
Interest Payable:					
PWLB borrowing	507	495	509	583	630
Finance Lease	24	16	9	2	0
PFI	303	279	309	387	411
Interest receivable	-30	-12	-12	-12	-12
Financing Costs	1,935	1,874	2,028	2,636	2,974
Net Revenue Stream	32,003	33,605	34,665	35,704	36,686
Ratio	6.0%	5.6%	5.9%	7.4%	8.1%
Ratio - Excluding PFI	4.8%	4.5%	4.5%	5.6%	6.1%

In 2022/23 the actual cost of financing is expected to be £2,028k; however, of this, £469k is attributable to the PFI schemes (£160k of MRP and £309k of interest). These PFI charges are covered by separate PFI grants.

## 1.6 **Prudence**

## (i) Capital Expenditure - Actual and Forecasts

		2020/21	2021/22	2022/23	2023/24	2024/25
		Actual	Estimate	Estimate	Estimate	Estimate
		£000	£000	£000	£000	£000
Capital Expe	enditure	844	2,753	7,774	4,634	6,255
Funded by:		 				
Internal Borr	owing	594	2,243	0	0	0
External Bor	rowing	0	0	5,896	3,551	5,375
Other Capita	l resources	250	510	1,878	1,083	880

The Authority's annual borrowing requirements consist of capital financing requirements plus replacement borrowing for debt repaid less a prudent Minimum Revenue Provision charged to revenue for debt payment. These borrowing requirements, after use of other capital resources, are set out above. Other capital resources include capital receipts and capital reserve transfers where required.

# (ii) Capital Financing Requirement (CFR)

The CFR is the capital expenditure incurred historically by the Authority that has yet to be financed (i.e., external debt less Minimum Revenue Provision).

It measures the PFCC's underlying need to borrow for capital purposes and ensures that borrowing is only undertaken to fund capital assets and not support revenue expenditure.

		2020/21	2021/22	2022/23	2023/24	2024/25
		Actual	Estimate	Estimate	Estimate	Estimate
		£000	£000	£000	£000	£000
Opening Capital Financing Re	quirement	17,144	16,607	17,754	22,438	24,312
Unsupported Borrowing to fund	d Capital Exp.	594	2,243	5,896	3,551	5,375
Minimum Revenue Provision:						
Supported Borrowing		-245	-235	-225	-216	-208
Unsupported Borrowing		-579	-575	-748	-1,099	-1,317
PFI and Finance Leases		-308	-287	-238	-361	-420
<b>Closing Capital Financing Req</b>	uirement	16,607	17,754	22,438	24,312	27,742

The PFCC is required to make a statutory charge to revenue for the repayment of supported debt (the Minimum Revenue Provision) and this reduces the CFR.

## (iii) Limits to Borrowing Activity

Within the Prudential Indicators there are several indicators to ensure that the PFCC operates its activities within well defined limits.

For the first of these, the PFCC should ensure that its debt net of investments does not, except in the short term, exceed the total of the Capital Financing Requirement (CFR) in the preceding year, plus the estimate of any additional CFR for 2022/23 and the next two financial years.

	2020/21	2021/22	2022/23	2023/24	2024/25
	Actual	Estimate	Estimate	Estimate	Estimate
	£000	£000	£000	£000	£000
Borrowing	12,191	11,848	17,375	19,380	24,105
PFI and Finance Leases	2,003	1,717	1,478	1,117	697
Investments	-4,900	-4,000	-4,000	-4,000	-4,000
Net Borrowing	9,295	9,564	14,853	16,497	20,802
Total CFR for borrowing purposes	16,607	17,754	22,438	24,312	27,742

The projected forecasts detailed in the table above show that there is still some margin between the net borrowing and the CFR and therefore the PFCC is well within the limits required.

- (iv) A further two prudential indicators control or anticipate the overall level of borrowing. These are:
  - (a) The **Authorised Limit** which represents the limit beyond which borrowing is prohibited and needs to be set and revised by the PFCC. Borrowing beyond this limit would be ultra

vires. The provision of temporary borrowing allows for temporary short-term borrowing in year to allow for cash flow movements.

(b) The **Operational Boundary** which is based on the probable external debt during the year. It includes scope for borrowing for revenue purposes that may be required in the short term during the year, if for instance a large grant payment was delayed.

Authorised Limit for External Debt	2021/22	2022/23	2023/24	2024/25
	Actual	Estimate	Estimate	Estimate
	£000	£000	£000	£000
Borrowing	11,848	17,375	19,380	24,105
PFI and Finance Leases	1,717	1,478	1,117	697
Provision for Temporary Borrowing	2,500	2,500	2,500	2,500
Net Borrowing	16,064	21,353	22,997	27,302
Operational Boundary for External Debt	2021/22	2022/23	2023/24	2024/25
	Actual	Estimate	Estimate	Estimate
	£000	£000	£000	£000
Borrowing	11,848	17,375	19,380	24,105
PFI and Finance Leases	1,717	1,478	1,117	697
Provision for Temporary Borrowing	1,500	1,500	1,500	1,500
Net Borrowing	15,064	20,353	21,997	26,302

The PFCC is asked to approve the following limits:

# (v) Actual External Debt

Actual External Debt	2021/22	2022/23	2023/24	2024/25
	Estimate	Estimate	Estimate	Estimate
	£000	£000	£000	£000
Borrowing	11,848	17,375	19,380	24,105
PFI and Finance Leases	1,717	1,478	1,117	697
Actual External Debt	13,564	18,853	20,497	24,802

## 1.7 Treasury Management Indicators

The purpose of these is to contain Treasury Management activity within certain limits, thereby reducing the risk or likelihood of an adverse movement in interest rates or borrowing decisions impacting negatively on the PFCC's overall financial position. The PFCC is asked to approve the following:

	Lower Limit	Upper Limit
Due within:	%	%
Less than 1 year	0.00	10.0
Between 1-2 years	0.00	10.0
Between 2-5 years	0.00	30.0
Between 5-10 years	0.00	50.0
Between 10-20 years	0.00	100.0
Over 20 years	0.00	100.0

# (i) Maturity Structure of borrowing

# (ii) Total principal sums invested for periods longer than 365 days

Based on estimated levels of funds and balances, the need for liquidity and day to day cash flow requirements, it is forecast that £800,000 (20%) of the overall balances can be considered for longer term investments over 365 days subject to comparative yields on short term investments.

# 2.0 MINIMUM REVENUE PROVISION (MRP) POLICY FOR 2022/23

- 2.1 Local authorities are statutorily required to pay off an element of accumulated capital expenditure funded from borrowing (Capital Financing Requirement CFR) through a charge to the Revenue Account (the Minimum Revenue Provision MRP).
- 2.2 MHCLG Guidance requires the Authority to approve an MRP Policy Statement in advance of each year. The MRP guidance offers a range of options, with an overriding recommendation that there should be prudent provision. The proposed policy for 2022/23 is as follows:
  - (a) for all **capital expenditure incurred before 1 April 2008**, MRP will be based on 4% of the Capital Financing Requirement (CFR) at that date.
  - (b) for capital expenditure incurred after 1 April 2008, which is supported by Government Borrowing Approvals, MRP will similarly be based on 4% of such sums reflected in subsequent CFR updates.
  - (c) for locally agreed Prudential Borrowing (unsupported borrowing) on capital expenditure incurred after 1 April 2008, 2 options are available:

<u>Asset Life Method</u> - The MRP for each asset acquired through unsupported borrowing is calculated using the following formulae:

Where:

- A = Capital expenditure (unsupported borrowing) on asset
- B = Total MRP already made against the asset
- C = Remaining useful life of the asset

**Depreciation Method** based on equal annual instalments over the estimated life of the asset for which the borrowing is undertaken using the following formulae:

$$\frac{A-B-D}{C}$$

Where:

- A = Capital expenditure (unsupported borrowing) on asset
- B = Total MRP already made against the asset
- C = Remaining useful life of the asset
- D = Residual Value of the Asset

The only difference between the two methods of calculating the MRP is that there is recognition in the Depreciation Method that the asset will still be worth 'something' after its useful life has expired.

The Authority has applied the Depreciation Method from 1st April 2019. This allows it to make a more prudent provision in that it will recognise, where applicable, that assets are still worth 'something' after their useful lives have expired and minimise the impact on revenue.

The estimated life of relevant assets will be assessed each year based on types of capital expenditure incurred but in general will between 40 to 50 years for property and land, and 5 to 15 years for vehicles, plant, and equipment. To the extent that expenditure does not create a physical asset and is of a type that is subject to estimated life periods that are referred to in the guidance e.g., software licences, these periods will generally be adopted by the Authority.

The guidance also allows the Authority to defer the introduction of an MRP charge for new capital projects/land purchases until the year after that in which the new asset becomes operational, rather than in the year borrowing is required to finance the capital spending. This approach can be beneficial for projects that take more than one year to complete and is therefore included as part of the MRP policy.

- (d) For "on balance sheet" PFI schemes, MRP will be equivalent to the "capital repayment element" of the annual service charge payable to the PFI Operator and for finance leases, MRP will also be equivalent to the "capital repayment (principal) element" of the annual rental payable under the lease agreement.
- 2.3 Therefore the Authority's total MRP provision from 1 April 2022 will be the sum of (a) + (b) + (c) + (d) (as defined above) which is considered to satisfy the prudent provision requirement. Based on this policy, total MRP in 2022/23 is estimated to be £1.212m (including £0.238m PFI and finance leases).

# 3.0 CURRENT TREASURY POSITION

	31st December 2021		
	Principal Average		
	Outstanding	Interest Rate	
	£m	%	
External Debt

- PWLB	12.0	4.4	
- Other Institutions	0.0	0.0	
Variable Rate	0.0	0.0	
	12.0	4.4	
Cash Available			
- Invested short term with NYCC	6.2	0.2	
- Current Accounts	0.0	0.0	
	6.2	0.2	

3.1 The Authority's treasury portfolio position at 31st December 2021 consisted of:

# 4.0 BORROWING STRATEGY

- 4.1 In practical terms the policy is to finance capital expenditure by borrowing from the Public Works Loan Board. Whilst individual loans have in the past been linked to the cost of specific capital assets or their useful life span, in future, loans will be taken out over varying periods depending on the perceived relative value of interest rates at the time of borrowing and the need to avoid a distorted loan repayment profile. To date, all the Authority's external borrowing is with PWLB.
- 4.2 There are a range of options available to the Authority for the borrowing strategy in 2022/23:
  - (a) Internal borrowing achieved by running down cash balances and foregoing interest earned at historically low rates. Based on analysis, this continues to be the cheapest borrowing. However, in view of the overall forecast for long-term borrowing rates to increase over the next few years, consideration will also be given to weighing the short-term advantage of internal borrowing against potential long-term costs if the opportunity is missed for taking PWLB or market loans at long term rates which will be higher in future years.
  - (b) PWLB rates are expected to gradually increase in the second half of the financial year so it would be advantageous to time any new external borrowing earlier in 2022/23.
- 4.3 One of the annual principal factors in increases in revenue costs relate to Capital Financing charges. The provision for debt repayment (otherwise known as the Minimum Revenue Provision or MRP) is a statutory calculation, whilst external interest payments are due under loan agreements with external borrowers. These sums are the product of past and future assumed borrowing.

# **Borrowing rates**

- 4.4 Over the last two years, the coronavirus outbreak has done huge economic damage to the UK and to economies around the world. After the Bank of England took emergency action in March 2020 to cut Bank Rate to 0.10%, it left Bank Rate unchanged at its subsequent meetings until raising it to 0.25% at its meeting on 16th December 2021 and more recently to 0.50% on 3<sup>rd</sup> February 2022.
- 4.5 As shown in the forecast table above, the forecast for Bank Rate now includes five increases, one in December 2021 to 0.25%, then quarter 2 of 2022 to 0.50%, quarter 1 of 2023 to 0.75%, quarter 1 of 2024 to 1.00% and, finally, one in quarter 1 of 2025 to 1.25%.
- 4.6 It is not expected that Bank Rate will go up fast after the initial rate rise as the supply potential of the economy is not likely to have taken a major hit during the pandemic: it should, therefore, be able to cope well with meeting demand after supply shortages subside over the next year, without causing inflation to remain elevated in the medium-term, or to inhibit inflation from falling back towards the Monetary Policy Committee's (MPC) 2% target after the spike up to around 5%. The forecast includes five increases in Bank Rate over the three-year forecast period to March 2025, ending at 1.25%. However, these forecasts may need to be revised due to uncertainties around economic recovery, rising utility prices, and the risk from new Covid variants.
- 4.7 It should also be borne in mind that Bank Rate being cut to 0.10% was an emergency measure to deal with the Covid crisis hitting the UK in March 2020. At any time, the MPC could remove that final emergency cut from 0.50% to 0.10% on no other grounds than it being no longer being warranted and as a step forward in the return to normalisation. In addition, any Bank Rate under 1% is both highly unusual and highly supportive of economic growth.

		PWLB			
	Bank Rate	5 year	10 year	25 year	50 year
	%	%	%	%	%
December 2021	0.25	1.40	1.60	1.80	1.50
March 2022	0.50	1.50	1.70	1.90	1.70
September 2022	0.50	1.60	1.80	2.10	1.90
March 2023	0.75	1.70	1.90	2.20	2.00
September 2023	0.75	1.80	2.00	2.20	2.00
March 2024	1.00	1.90	2.10	2.30	2.10
September 2024	1.00	1.90	2.10	2.40	2.20
March 2025	1.25	2.00	2.30	2.50	2.30

4.8 The **current interest rate forecasts** of NYCC's Treasury Management Advisors (Link Asset Services - Treasury Solutions) are as follows:

## External v Internal Borrowing

4.9 The Authority has undertaken internal borrowing of £5,415,000 to 31<sup>st</sup> March 2021 and there is further internal borrowing of £2,243,000 planned in respect of the 2021/22 capital programme. This option is possible because of the Authority's cash balance with a daily average of £7,109,000 between the 1st April and 31st December 2021. This consists of cash flow generated from creditors, core cash (via reserves and provisions) and cash built

up through minimum revenue provision due to most debt outstanding being on a maturity basis. Repayment of maturing debt of £344,000 is due in 2022/23.

- 4.10 In considering the use of the internal borrowing option, two significant risks considered are:
  - (a) The implications of day-to-day cash constraints, and
  - (b) Short-term saving by delaying new long-term borrowing in 2022/23 must be weighed against the loss of longer-term interest rate stability. If it was felt that there was a significant risk of a much sharper rise in borrowing rates than that currently forecast, perhaps arising from an acceleration in the rate of increase in central rates in the USA and UK, an increase in world economic activity, or a sudden increase in inflation risks, then the most likely, fixed rate funding will be drawn whilst interest rates are lower than they are projected to be in the next few years.
- 4.11 The Chief Finance Officer will monitor interest rates in financial markets and adopt a pragmatic approach to changing circumstances.

# 5.0 POLICY ON BORROWING IN ADVANCE OF NEED

5.1 The Authority will not borrow more than or in advance of its needs purely to profit from the investment of the extra sums borrowed. Any decision to borrow in advance will be within the approved Capital Financing Requirement estimate and will be considered carefully to ensure that value for money can be demonstrated and that the Authority can ensure the security of such funds.

Borrowing in advance will be made within the constraints that:

- (a) there is a clear business case for doing so for the current Capital Plan.
- (b) it will be used to finance future debt maturity repayments.
- (c) it will offer value for money can be demonstrated; and
- (d) the Authority can ensure the security of such funds which are subsequently invested
- 5.2 Risks associated with any borrowing in advance of activity will be subject to prior appraisal and subsequent reporting through the mid-year or annual reporting mechanism.

## 6.0 REVIEW OF LONG-TERM DEBT AND DEBT RESCHEDULING

6.1 The rescheduling of debt involves the early repayment of existing debt and its replacement with new borrowing. This can result in one off costs, or benefits, called respectively premiums and discounts. These occur when the rate of the loan repaid varies from comparative current rates. Where the interest rate of the loan to be repaid is higher than current rates, a premium is charged by the PWLB for repayments. Where the interest rate of the loan to be repaid is lower than the current rate, a discount on repayment is paid by the PWLB.

### Premature repayment of External Debt

6.2 No early debt repayment or rescheduling exercises have been affected to date nor are proposed in 2022/23. Higher rate historical borrowing continues to be cheaper compared with current repayment premiums and interest rates. The situation will continue to be monitored to identify any opportunities for the Authority's debt portfolio that may arise. Such opportunities, however, are limited in the current economic climate.

# 7.0 ANNUAL INVESTMENT STRATEGY

- 7.1 By virtue of the Service Level Agreement with North Yorkshire County Council, the Authority has adopted the Annual Investment Strategy of the Council which is embedded within the terms of the agreement and within the services which the Council provides on the Authority's behalf. NYCC's Annual Treasury Management and Investment Strategy for 2022/23 was approved by its Executive Board on 25th January 2022 and will go to County Council for formal approval on 16th February 2022.
- 7.2 The net return/cost achieved by the County Council is monitored by the Authority's Chief Finance Officer to ensure it does not diverge materially from the budgeted amount.
- 7.3 Within the terms of the contract the County Council continues to make all investments in accordance with the Local Government Act 2003. The County Council's Investment Strategy has regard to the following:
  - MHCLG's Guidance on Local Government Investments (the Guidance)
  - CIPFA Treasury Management in Public Services Code of Practice and Cross Sectoral Guidance Notes 2017 (the Code)
  - CIPFA Treasury Management Guidance Notes 2018

The County Council's investment priorities will be security first, portfolio liquidity second and then yield (return).

- 7.4 The above guidance from the MHCLG and CIPFA place a high priority on the management of risk. The County Council has adopted a prudent approach to managing risk and defines its risk appetite by the following means:
  - a) minimum acceptable credit criteria are applied to generate a list of highly creditworthy counterparties. This also enables diversification and thus avoidance of concentration risk. The key ratings used to monitor counterparties are the short term and long-term ratings.
  - b) other information: ratings will not be the sole determinant of the quality of an institution; it is important to continually assess and monitor the financial sector on both a micro and macro basis and in relation to the economic and political environments in which institutions operate. The assessment will also take account of information that reflects the opinion of the markets. To achieve this consideration, the County Council will engage with its advisors to monitor market pricing such as "credit default swaps" and overlay that information on top of the credit ratings.
  - c) other information sources used will include the financial press, share price and other such information pertaining to the financial sector to establish the most robust scrutiny process on the suitability of potential investment counterparties.

- d) the County Council has defined the list of types of investment instruments that the treasury management team are authorised to use: -
  - **Specified investments** are those with a high level of credit quality and subject to a maturity limit of one year.
  - Non-specified investments are those with less high credit quality, may be for periods more than one year, and/or are more complex instruments which require greater consideration by officers before being authorised for use. Once an investment is classed as non-specified, it remains non-specified all the way through to maturity i.e., an 18-month deposit would still be non-specified even if it has only 11 months left until maturity.

**Non-specified investments limit.** The County Council has determined that it will limit the maximum total exposure to non-specified investments as being 20% of the total investment portfolio, (£40m).

- e) **Lending limits**, (amounts and maturity), for each counterparty will be set.
- f) the County Council will set a limit for its investments which are invested for **longer than 365 days**.
- g) investments will only be placed with counterparties from countries with a specified minimum **sovereign rating**.
- h) the County Council has engaged **external consultants**, to provide expert advice on how to optimise an appropriate balance of security, liquidity, and yield, given the risk appetite of the County Council in the context of the expected level of cash balances and need for liquidity throughout the year; and
- i) all investments will be denominated in **sterling**.
- 7.5 The County Council will also pursue value for money in treasury management and will monitor the yield from investment income against appropriate benchmarks for investment performance. Regular monitoring of investment performance will be carried out during the year.

## Creditworthiness Policy

- 7.6 The County Council applies the creditworthiness service provided by the Link Group. This service employs a sophisticated modelling approach utilising credit ratings from the three main credit rating agencies Fitch, Moody's, and Standard & Poor's. The credit ratings of counterparties are supplemented with the following overlays:
  - "watches" and "outlooks" from credit rating agencies.
  - CDS spreads that may give early warning of likely changes in credit ratings; and
  - sovereign ratings to select counterparties from only the most creditworthy countries.

This modelling approach combines credit ratings, and any assigned Watches and Outlooks in a weighted scoring system which is then combined with an overlay of CDS spreads. The end product of this is a series of colour coded bands which indicate the relative creditworthiness of counterparties. These colour codes are used by the County Council to determine the suggested duration for investments.

- 7.7 The Link Group creditworthiness service uses a wider array of information other than just primary ratings. Furthermore, by using a risk weighted scoring system, it does not give undue preponderance to just one agency's ratings.
- 7.8 Typically, the minimum credit ratings criteria the County Council use will be a short-term rating (Fitch or equivalents) of F1 and a long-term rating of A-. There may be occasions when the counterparty ratings from one rating agency are marginally lower than these ratings but may still be used. In these instances, consideration will be given to the whole range of ratings available, or other topical market information, to support their use.
- 7.9 All credit ratings will be monitored daily. The County Council is alerted to changes to ratings of all three agencies through its use of the Link Group creditworthiness service.
- 7.10 If a downgrade results in the counterparty / investment scheme no longer meeting the County Council's minimum criteria, its further use as a new investment will be withdrawn immediately.
- 7.11 In addition to the use of credit ratings the County Council will be advised of information in movements in Credit Default Swap (CDS) spreads against the iTraxx European Financials benchmark and other market data daily via its Passport website, provided exclusively to it by Link Group. Extreme market movements may result in downgrade of an institution or removal from the County Council's lending list.
- 7.12 Sole reliance will not be placed on the use of this external service. In addition, the County Council will also use market data and market information, as well as information on any external support for banks to help support its decision-making process.
- 7.13 Significant levels of downgrades to Short and Long-Term credit ratings have not materialised since the crisis in March 2020. In the main, where they did change, any alterations were limited to Outlooks. However, as economies are beginning to reopen, there have been some instances of previous lowering of Outlooks being reversed.
- 7.14 Although bank CDS prices, (these are market indicators of credit risk), spiked upwards at the end of March / early April 2020 due to the heightened market uncertainty and ensuing liquidity crisis that affected financial markets, they have returned to more average levels since then. However, sentiment can easily shift, so it will remain important to undertake continual monitoring of all aspects of risk and return in the current circumstances.

## **Country limits**

- 7.15 Due care will be taken to consider the exposure of the County Council's total investment portfolio to non-specified investments, countries, groups, and sectors.
- 7.16 Non-specified investment limit. The County Council has determined that it will limit the maximum total exposure to non-specified investments as being 20% of the total investment portfolio.
- 7.17 **Country limit**. The County Council has determined that it will only use approved counterparties from the UK and from non-UK countries with a minimum sovereign credit rating of AA- from Fitch. The list of countries that qualify using these credit criteria as at the date of this report is shown in **Schedule B**. This list will be added to, or deducted from, by officers should ratings change in accordance with this policy.

#### Investment strategy

- 7.18 Under the Service level agreement, NYCC collects all available balances from the Authority and other organisations using the Treasury Management service and pools with NYCC funds. These aggregated balances are then invested in accordance with the agreed Investment Strategy.
- 7.19 **In-house funds.** Investments will be made with reference to the core balance and cash flow requirements of authorities within the pool and the outlook for short-term interest rates (i.e., rates for investments up to 12 months). Greater returns are usually obtainable by investing for longer periods. While most cash balances are required to manage daily cash flow requirements, where cash sums can be identified that could be invested for longer periods, the value to be obtained from longer term investments will be carefully assessed:
  - if it is thought that Bank Rate is likely to rise significantly within the time horizon being considered, then consideration will be given to keeping most investments as being short term or variable; or
  - conversely, if it is thought that Bank Rate is likely to fall within that time, consideration will be given to locking in higher rates currently obtainable, for longer periods.

# 8.0 OTHER TREASURY MANAGEMENT ISSUES

# The scheme of delegation and role of the section 151 officer in relation to Treasury Management

- 8.1 The Government's Investment Guidance requires that a local authority includes details of the Treasury Management schemes of delegation and the role of the Chief Finance Officer in the Annual Treasury Management/Investment Strategy.
- 8.2 The key elements of delegation in relation to Treasury Management are set out in Section 5.7 the Service's Financial Regulations within its Corporate Governance Framework.

## Arrangements for Reporting

8.3 Current reporting arrangements for the reporting of Treasury Management activities comprise the receipt by the Police, Fire and Crime Commissioner of an Annual Strategy and plan in advance of the year. The PFCC will receive as a minimum, a mid-year review and an annual report after its close.

# NORTH YORKSHIRE POLICE, FIRE & CRIME COMMISSIONER (FIRE & RESCUE AUTHORITY

# CAPITAL STRATEGY

#### 1.0 BACKGROUND

- 1.1 The purpose of the Capital Strategy is to demonstrate that the Authority takes capital expenditure and investment decisions in line with corporate and service objectives and properly takes account of stewardship, value for money, prudence, sustainability, and affordability. It sets out the long-term context in which capital expenditure and investment decisions are made and gives due consideration to both risk and reward and impact on the achievement of priority outcomes.
- 1.2 The Capital Strategy comprises several distinct, but inter-related, elements as follows:

#### (a) Capital Expenditure (Paragraph 2)

This section includes an overview of the governance process for approval and monitoring of capital expenditure, including the Authority's policies on capitalisation, and an overview of its capital expenditure and financing plans.

#### (b) Capital Financing and Borrowing (Paragraph 3)

This section provides a projection of the Authority's capital financing requirement, how this is impacted by capital expenditure decisions and how it will be funded and repaid. It therefore sets out the Authority's borrowing strategy and explains how it will discharge its duty to make prudent revenue provision for the repayment of debt.

#### (c) Chief Finance Officer's statement (Paragraph 4)

This section contains the Chief Finance Officer's views on the deliverability, affordability and risk associated with the capital strategy.

## 1.3 Alternative Investments

The prolonged low interest rate environment has resulted in reduced returns on treasury management investments. Moreover, the introduction of the general power of competence has given local authorities far more flexibility in the types of activity they can engage in. At the time of writing the Capital Strategy, there are no alternative investment activities that count as capital expenditure being considered by the Authority.

### 2.0 CAPITAL EXPENDITURE

#### **Capitalisation Policy**

- 2.1 Expenditure is classified as capital expenditure when it results in the acquisition or construction of an asset (e.g., land, buildings, vehicles, plant, and equipment etc.) that:
  - Will be held for use in the delivery of services, for rental to others, investment or for administrative purposes; and

• Are of continuing benefit to the Authority for a period extending beyond one financial year.

Subsequent expenditure on existing assets is also classified as capital expenditure if these two criteria are met.

- 2.2 There may be instances where expenditure does not meet this definition but would be treated as capital expenditure, including:
  - Where the Authority has no direct future control or benefit from the resulting assets, but would treat the expenditure as capital if it did control or benefit from the resulting assets; and
  - Where statutory regulations require the Authority to capitalise expenditure that would not otherwise have expenditure implications according to accounting rules.
- 2.3 The Authority operates a de-minimis limit for capital expenditure of £10,000. This means that items below these limits are charged to revenue rather than capital.

#### Governance

- 2.4 Capital expenditure is a necessary element in the development of the Authority's services since it generates investment in new and improved assets. Capital expenditure is managed through the five-year Capital Programme reviewed annually as part of the budget setting process and reviewed in year as part of financial monitoring arrangements.
- 2.5 The Authority's Code of Corporate Governance provides a framework for the preparation and appraisal of schemes proposed for inclusion in the Capital Plan, appropriate authorisations for individual schemes to proceed and facilitate the overall management of the Capital Programme within defined resource parameters.
- 2.6 The Chief Finance Officer shall determine the format of the Capital Programme and the timing of reports relating to it. The approved Capital Programme will comprise several individual schemes each of which will be quantified on an annualised basis. Relevant Budget Holders will prepare a draft Capital Programme, in consultation with the Chief Finance Officer, for submission to the PFCC. The Capital Programme should identify planned expenditure, and funding, at proposed individual scheme or project level.
- 2.7 The Chief Finance Officer is responsible for preparing an overall Capital Programme for consideration and approval by the PFCC, the funding of which being compatible always with the Treasury Management Policy Statement of the Authority. Individual schemes shall only be included in the Capital Plan following a project appraisal process undertaken in accordance with the Code of Corporate Governance.

## Capital Expenditure and Funding Plans

- 2.8 The Authority's capital expenditure plans as per the Capital Programme are set out in **Appendix B Paragraph 1.6(i)**.
- 2.9 When expenditure is classified as capital expenditure for capital financing purposes, this means that the Authority can finance that expenditure from any of the following sources:
  - (a) **Capital grants and contributions** amounts awarded to the Authority in return for past or future compliance with certain stipulations.

- (b) **Capital receipts** amounts generated from the sale of assets and from the repayment of capital loans, grants, or other financial assistance.
- (c) **Revenue contributions** amounts set aside from the revenue budget in the Reserve for Future Capital Funding.
- (d) **Borrowing** amounts that the Authority does not need to fund immediately from cash resources, but instead charges to the revenue budget over several years into the future.
- 2.10 The implications of financing capital expenditure from 'borrowing' are explained in section 3 below.

# 3.0 CAPITAL FINANCING REQUIREMENT AND BORROWING

## Context

- 3.1 The Authority is required to comply with the CIPFA Prudential Code for Capital Finance in Local Authorities (referred to as the 'Prudential Code') when assessing the affordability, prudence, and sustainability of its capital investment plans.
- 3.2 Fundamental to the prudential framework is a requirement to set a series of prudential indicators. These indicators are intended to collectively build a picture that demonstrates the impact over time of the Authority's capital expenditure plans upon the revenue budget and upon borrowing and investment levels and explain the overall controls that will ensure that the activity remains affordable, prudent, and sustainable.
- 3.3 A summary of the actual prudential indicators for 2020/21, and the estimates for 2022/23 through to 2024/25, are provided in **Appendix B Paragraph 1**.

## Capital Financing Requirement (CFR)

- 3.4 When capital expenditure is funded from borrowing, this does not result in expenditure being funded immediately from cash resources but is instead charged to the revenue budget over several years. It does this in accordance with its policy for the repayment of debt, which is set out in **Appendix B Paragraph 2.**
- 3.5 The forward projections of the CFR reflect:
  - Additional capital expenditure from borrowing or further credit arrangements resulting in an increase to the CFR and
  - Revenue budget provision being made for the repayment of debt, which results in a reduction to the CFR.

3.6 The actual CFR for 2021/22 and forward projections for the current and forthcoming years are as follows:

		2020/21	2021/22	2022/23	2023/24	2024/25	
			Estimate	Estimate	Estimate	Estimate	
		£000	£000	£000	£000	£000	
Opening Capital Financing Requirement		17,144	16,607	17,754	22,438	24,312	
Unsupported Borrowing to fund Capital Exp.		594	2,243	5,896	3,551	5,375	
Minimum Revenue Provision:							
Supported Borrowing		-245	-235	-225	-216	-208	
Unsupported Borrowing		-579	-575	-748	-1,099	-1,317	
PFI and Finance Leases		-308	-287	-238	-361	-420	
Closing Capital Financing Requirement		16,607	17,754	22,438	24,312	27,742	

3.7 CFR increases are dependent on the level of capital investment and external borrowing undertaken.

# **External Borrowing Limits**

- 3.8 The Authority is only permitted to borrow externally (including via credit arrangements) up to the level implied by its Capital Financing Requirement (CFR). To ensure that external borrowing does not exceed the CFR, other than in the short term, limits are established for external debt, as follows:
  - (a) The **Authorised Limit** which represents the limit beyond which borrowing is prohibited and needs to be set and revised by the PFCC. Borrowing beyond this limit would be ultra vires. The provision of temporary borrowing allows for temporary short-term borrowing in year to allow for cash flow movements.
  - (b) The **Operational Boundary** which is based on the probable external debt during the year. It includes scope for borrowing for revenue purposes that may be required in the short term during the year, if for instance a large grant payment was delayed.

The proposed limits, which are set out in **Appendix B Paragraph 1.6**, make separate provision for external borrowing and other long-term liabilities, and are based upon an estimate of the most likely but not worst-case scenarios. They allow sufficient headroom for fluctuations in the level of cash balances and in the level of the CFR.

The	agreed	Operational	Boundary	and	Authorised	Limits	for	external	debt	are	as
follow	/S:		_								

Authorised Limit for External	Debt	2021/22	2022/23	2023/24	2024/25	
		Actual	Estimate	Estimate	Estimate	
		£000	£000	£000	£000	
Borrowing		11,848	17,375	19,380	24,105	
PFI and Finance Leases		1,717	1,478	1,117	697	
Provision for Temporary Borrowing		2,500	2,500	2,500	2,500	
Net Borrowing		16,064	21,353	22,997	27,302	
Operational Boundary for External Debt		2021/22	2022/23	2023/24	2024/25	
		Actual	Estimate	Estimate	Estimate	
		£000	£000	£000	£000	
Borrowing		11,848	17,375	19,380	24,105	
PFI and Finance Leases		1,717	1,478	1,117	697	
Provision for Temporary Borrowing		1,500	1,500	1,500	1,500	
Net Borrowing		15,064	20,353	21,997	26,302	

## **Borrowing Strategy**

- 3.9 The Authority's Borrowing Strategy is set out in **Appendix B Paragraph 4**.
- 3.10 The Authority is currently maintaining an under borrowed position. This means that the Capital Financing Requirement (CFR) has not been fully funded from long-term external borrowing as cash supporting the Authority's reserves and balances has been used as a short-term measure.
- 3.11 The use of internal borrowing has been an effective strategy in recent years as:
  - (a) It has enabled the Authority to avoid significant external borrowing costs; and
  - (b) It has mitigated significantly the risks associated with investing cash in what has often been a volatile and challenging market.
- 3.12 The internal borrowing position will be carefully reviewed and monitored on an ongoing basis to consider any changes to borrowing rates as well as current and future cash flow constraints.
- 3.13 The external borrowing requirement will also be kept under review, and long-term external loans will be secured within the parameters established by the authorised limit and operational boundary for external debt.
- 3.14 Opportunities to generate savings by refinancing or prematurely repaying existing longterm debt will also be kept under review. Potential savings will be considered in light of the current treasury position and the costs associated with such actions.

### Minimum Revenue Provision

- 3.15 The Authority sets cash resources aside from the Revenue Budget each year to repay the borrowing. This practice is referred to as the minimum revenue provision (MRP) for the repayment of debt.
- 3.16 The Capital Financing Requirement (CFR) provides a measure of the amount of capital expenditure which has been financed from borrowing that the Authority has yet to fund from cash resources.
- 3.17 Statutory guidance requires MRP to be provided annually on a prudent basis. In accordance with the requirement to make a prudent 'revenue provision for the repayment of debt', the Authority ensures that debt is repaid over a period that is commensurate with the period over which the capital expenditure provides benefit. The revenue budget provision for MRP charges in 2022/23 has been compiled on a basis consistent with this policy.

# 4.0 CHIEF FINANCE OFFICER STATEMENT

#### Background

- 4.1 The Prudential Code for Capital Finance in Local Authorities (the Prudential Code) plays a key role in capital finance in local authorities. Local authorities determine their own programmes for investment that are central to the delivery of quality public services. The Prudential Code was developed by CIPFA as a professional code of practice to support local authorities in making their decisions. Local authorities are required by regulation to have regard to the Prudential Code when carrying out their duties under Part 1 of the Local Government Act 2003.
- 4.2 In financing capital expenditure, local authorities are governed by legislative frameworks, including the requirement to have regard to CIPFA's Treasury Management in the Public Services: Code of Practice and Cross-Sectoral Guidance Notes.
- 4.3 In order to demonstrate that capital expenditure and investment decisions are taken in line with service objectives and properly take account of stewardship, value for money, prudence, sustainability and affordability, the Prudential Code requires authorities to have in place a Capital Strategy. This sets out the long term context in which capital expenditure and investment decisions are made, and gives due consideration to both risk and reward and impact on the achievement of priority outcomes.
- 4.4 The Prudential Code requires the Chief Finance Officer to report explicitly on the affordability and risk associated with the Capital Strategy. The following are specific responsibilities of the Section 151 Officer:
  - recommending clauses, treasury management policy/practices for approval, reviewing regularly, and monitoring compliance.
  - submitting treasury management reports.
  - submitting capital budget reports.
  - reviewing the performance of the treasury management function.
  - ensuring the adequacy of treasury management resources and skills, and the effective division of responsibilities within the treasury management function.

- ensuring the adequacy of internal audit and liaising with external audit.
- recommending the appointment of external service providers.
- preparation of a capital strategy to include capital expenditure, capital financing, nonfinancial investments, and treasury management.
- ensuring that the capital strategy is sustainable, affordable, and prudent in the long term and provides value for money.
- ensuring that due diligence has been carried out on all treasury and non-financial investments and is in accordance with the risk appetite of the Authority.
- ensure that the Authority has appropriate legal powers to undertake expenditure on non-financial assets and their financing.
- ensuring the proportionality of all investments so that the Authority does not undertake a level of investing which exposes the Authority to an excessive level of risk compared to its financial resources.
- ensuring that an adequate governance process is in place for the approval, monitoring and ongoing risk management of all non-financial investments and longterm liabilities.
- provision to the PFCC of a schedule of all non-treasury investments including material investments in subsidiaries, joint ventures, loans, and financial guarantees.
- ensuring that the PFCC is adequately informed and understand the risk exposures taken on by the Authority.
- ensuring that the Authority has adequate expertise, either in house or externally provided.
- creation of Treasury Management Practices which specifically deal with how non treasury investments will be carried out and managed.
