Protect yourself and those you care about: safelincs.co.uk/hfsc/NYFRS

APPROACH

NORTH YORKSHIRE
FIRE & RESCUE SERVICE

Based on our understanding of risk in York and North Yorkshire, our Prevention Service focuses on 3 priority areas:

Accidental dwelling fire risk and fatality / injury risk

Road risk and fatality / serious injury risk

Water risk; flooding, rescues and other water related risks

Our prevention approach consists of: targeted interventions; partnership working and collaboration; communications and engagement; and safeguarding.

STRATEGIC ALIGNMENT

**NORTH YORKSHIRE
FIRE & RESCUE SERVICE**

Activity	Risk and Resource Model	Fire and Rescue Plan
4075 Home Fire Safety Visits (Safe and Well) completed between April 2022 and March 2023.	Be clear, relevant and consistent in how we deliver prevention services.	Actively engage with all communities to identify need and risk, and to reassure.
Our work is aligned to the National Fire Chiefs Council nationally recognised Person Centred Framework.	Deliver our prevention services based on an evidence and intelligence-based approach to prioritise work.	Enhance positive culture, openness, integrity and public trust.
We have enhanced our referral process through partnership working and a new referral form.	Collaborate with partners to identify those most at risk and work with them to reduce risk and improve safety.	Work jointly as a trusted partner to prevent harm and damage, intervene early and solve problems.
We have refocused our work based on risk, vulnerabilities and consequence.	Provide more even access to prevention services across the county and more targeted delivery.	Deliver the “Right People, Right Support” every time.
We have introduced a quality assurance and evaluation framework / process for Home Fire Safety Visits (Safe and Well).	Ensure our staff have the necessary competencies and knowledge to deliver prevention services in a professional manner and to a high standard.	Maximise efficiency to make the most effective use of all available resources.

MANAGING PERFORMANCE

**NORTH YORKSHIRE
FIRE & RESCUE SERVICE**

- Home fire safety Performance Dashboards used to report outstanding requests to districts and report into Service Delivery
- Speed data logger deployments managed by Prevention and fed into Road Safety Task Group meetings
- Quality Assurance Framework being implemented and trialled in service to ensure our interventions are being delivered to a high standard, areas of improvement will be highlighted and managed locally
- Community Risk Profile data used to assist decisions on targeted work in communities to ensure performance against risk profile
- Request and listen to feedback from Prevention Team, the wider organisation and our partners

WORKING WELL

**NORTH YORKSHIRE
FIRE & RESCUE SERVICE**

How effective is the FRS at preventing fires and other risks?

●●●○ Good

North Yorkshire Fire and Rescue Service is good at preventing fires and other risks.

North Yorkshire Fire and Rescue Service required improvement in its 2018/19 assessment.

- The culture of and commitment to prevention and continuous learning across the entire service
- Reaching more high risk / high consequence individuals / groups in rural areas
- Behavioural change through youth intervention
- Public Safety Service (recognised as Promising Practice)
- Relationship with our regional Fire and Rescue Services
- Innovative new work with partners such as Yorkshire Ambulance Service with a SafeLincs App

CHALLENGES

NORTH YORKSHIRE
FIRE & RESCUE SERVICE

- Accurate use of Data
- Prevention Team expansion. We are gradually developing the Prevention Team which has begun with the introduction of a new Head of Early Intervention and Prevention, but the existing team is relatively small which can impact resilience.
- Organisational directional / cultural change.
- At times our partner organisations resources and capacity to work together.
- At times, new legislation, new requirements, new standards, and new guidance which requires us to complete project / programme activity in addition to Business as Usual.
- The impact of not being able to prevent all harm, and the emotional impact to our people when the public we seek to protect experience serious injuries and fatalities.

IMPROVEMENT

**NORTH YORKSHIRE
FIRE & RESCUE SERVICE**

- We are currently creating a new Prevention Strategy, Tactical Delivery Plan and Benefits Framework to drive activity and measure impact
- We are exploring ICT solutions which help us to use new data sets to improve targeting of prevention activity
- We hope to expand the capacity of the Prevention Team further, in accordance with the Risk and Resource Model
- We plan to expand the reach of the Public Safety Service
- We now have a Post Incident Engagement process, providing a preventative and 'community trauma' response
- We are making improvements in Assurance and Evaluation of prevention activity
- We are developing our Safeguarding policy, processes and practices
- We plan to better understand the accessibility and impact of our services to minoritised individuals and groups
- We are investing into developing relationships with our Community Safety Partnerships and NHS partners
- We are expanding our learning around 'near misses' and applying that learning directly back into prevention services

IMPACT

**NORTH YORKSHIRE
FIRE & RESCUE SERVICE**

Our impact / performance framework is being refined to ensure we can evidence the requirements contained within:

- **The Prevention Fire Standard** ie:
 - Improved safety, health and wellbeing of communities leading to a **reduction in incidents**, injuries, serious injuries and fatalities.
 - Improved competency in the prevention workforce, including an **increase in the number of employees and volunteers trained**.
 - Improved evaluation to **increase the efficiency and effectiveness** of prevention activities.
- **Risk and Resource Model**
- **Fire and Rescue Plan Priorities and Objectives**
- **HMICFRS Criteria**

A THANK YOU

**NORTH YORKSHIRE
FIRE & RESCUE SERVICE**

None of our work would be possible without:

- North Yorkshire Fire and Rescue Service Prevention Team, including our Community Safety Officers and Public Safety Officers.
- North Yorkshire Fire and Rescue Service Firefighters in each of our districts.
- The commitment and support of local, regional and national partner organisations.
- Our regional Fire and Rescue Services who share learning and best practice.
- Our communities.
- Funding through the Office of the Police, Fire and Crime Commissioner.
