EVALUATION

Background about evaluation

Conformance evaluation of web accessibility requires a combination of semi-automated evaluation tools and manual evaluation by an experienced reviewer. The evaluation results in this report are based on an evaluation conducted on the following date(s): 05/11/2024 - 07/11/2024. The website may have changed since that time.

Scope of review

As websites are composed of many pages, it is impossible to test every single page manually. Because of this a representative page sample approach is taken. We generally review all the key pages and the main page types – experience has shown that it is not necessary to review all pages, as the same issues tend to be repeated, especially with a large CMS-managed site.

REVIEW PROCESS

Conformance

Guidelines

[Web Content Accessibility Guidelines \(WCAG\) 2.2](#)

Conformance Level (AA standard)

Mixd checks that the Web page satisfies all the Level A and Level AA Success Criteria, or a Level AA conforming alternate version is provided.

Accessibility testing tools

The following tools were used in the review, including automated checkers, browsers, browser plugins, readability test tool, colour contrast test tool and screen readers.

Tools used during this review:

- [Mac OSX VoiceOver](#)
- [WebAIM Color Contrast Checker](#)
- [Axe](#)
- [Google Lighthouse](#)
- [Adobe Acrobat Pro](#)
- [Color Picker](#)

Manual testing

- Keyboard testing: navigation and focusable items
- Check for links with ambiguous link text
- Check for alt attributes
- Check form elements: descriptive labels and/or ARIA attributes
- Zoom readability/usability
- Page structure: landmarks and headings

Screen reader testing (i.e. Apple Voiceover)

- Quality and accuracy of link text and image attributes
- Spelling mistakes and reading order
- Interactivity with custom controls
- Accuracy of ARIA properties
- Accessibility of dynamic changes: predictive search, page content that changes on activation, filtered listings

Automated Testing

Mixd uses automated tools as a quick and simple way to catch obvious accessibility barriers. However, they will only find around 40% of issues which is why we also perform manual checks.

RESULTS AND ACTIONS

Summary of review results

Mixd performed critical path testing on the 10 pages and 2 PDFs listed above under '[Scope of review](#)'.

This website is not compliant with the WCAG 2.2 guidelines to AA standard.

Accessibility features in which this site is strong include:

- [1.4.3 Contrast \(Minimum\)](#)
- [1.4.10 Reflow](#)
- [2.4.6 Headings and Labels](#)

PDF Documents

The pdf documents tested both do not have a title defined. The reading order of one of the documents does not match the expected journey. This could have happened because images or other items were added to the document at a later stage. Not all of the images on the document have alternative text available.
