# Prevention Summary

## Home Fire Safety Visits (HFSVs)

1 July 2025 to 30 September 2025

### Home Fire Safety Visits (HFSVs)

- We have completed 1424 HFSVs in quarter 2 (Q2). This is a 38% increase on the same reporting period last year whilst responding to the major incident
- Very High and High risk HFSVs have increased by 19% on the same reporting period as last year

### Notable Practice

- The continuous improvement regarding the increase in completed HFSV during an extremely busy operational Q2 is commendable.
- Whole-time crews completed 1101 HFSVs in Q2 this year, compared to 722 during the same period last year which is a 43% increase
- We continue to see a much more targeted approach, identifying those most vulnerable in our communities. 69% of 1424 HFSV completed were categorised as Very High and High risk
- 8 quality assurance and evaluation checks have been undertaken within Q2 against 4 in Q2 2024/25
- HFSVs are monitored by the Community Risk and Resilience Performance Group every month. Outstanding HFSVs are discussed and issues by exception are overseen by the group until completion

# Prevention

Home Fire Safety Visits (HFSVs) completed

## 1 July 2025 to 30 September 2025

Total HFSVs 1424

### HFSVs completed by category:

125 Very High risk

851 High risk

448 Medium and Low risk

## 1 July 2024 to 30 September 2024

Total HFSVs 841

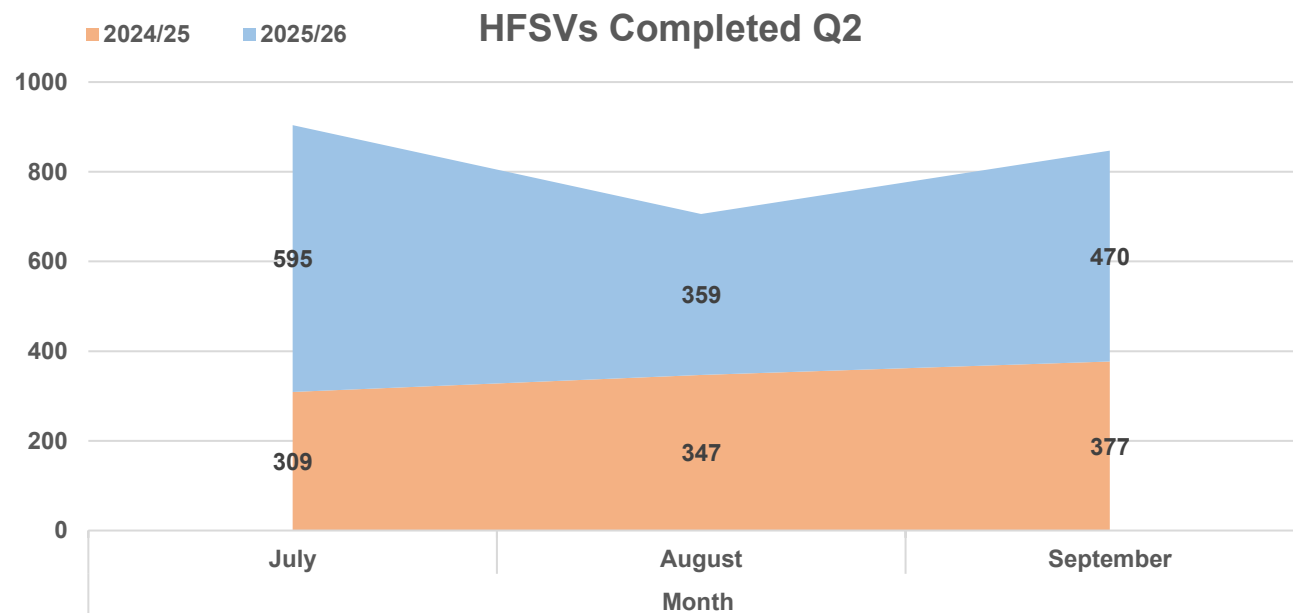

### HFSVs completed by category:

134 Very High risk

686 High risk

213 Medium and Low risk

Very High and High risk HFSVs have increased by 19% on last year

# Protection Summary

1 July 2025 to 30 September 2025 comparison

## 1 July 2024 to 30 September 2024

Protection Group	Count of Jobs
⊕ statutory & non statutory consultations	542
⊕ regulatory activity	503
⊕ guidance & advisory	197
⊕ afas & uwfs	13
Total	1255

## 1 July 2025 to 30 September 2025

Protection Group	Count of Jobs
⊕ statutory & non statutory consultations	462
⊕ regulatory activity	301
⊕ guidance & advisory	194
⊕ afas & uwfs	46
Total	1003

- Q2 of the revised risk-based intervention programme (RBIP), (classed as regulatory activity which consists of fire safety audits) is down (20%) on Q2 of the same reporting period last year, which was anticipated due to a more targeted RBIP at the highest risk premises across North Yorkshire and the City of York
- Even though Q2 was a very busy operational period, protection activity was only down (3%) on Q1 2025
- 99% of all fire safety jobs were completed by specific Business Fire Safety Officers

# Overall Fire Engine Availability

1 July 2025 to 30 September 2025

The overall average fire engine availability within the reporting period is **66%**. No change on the previous year's availability

- Managing fire engine availability is a continuous focus for NYFRS. There is significant effort put into improving availability across the Service, including a dedicated On-call Futures Officer working with businesses and local fire stations to improve availability in towns and villages
- We have 24/7 oversight of fire engine availability and business continuity planning arrangements are in place. The dynamic cover tool (DCT) provided support during the management of fire cover over this reporting period with high numbers of resources being used during the Langdale Wildfire incident
- The whole-time firefighter recruitment campaign concluded in June and 18 potential firefighters started the recruit's course in September

# Response Standards

1 July 2025 to 30 September 2025

- We cover one of the largest (3200 square miles) geographical areas of the 'predominately rural fire and rescue services' as defined by the Department for Environment, Food and Rural Affairs (DEFRA) and have a similar number of fire stations as the other predominately rural services who cover much smaller areas. This means incidents in the more rural areas significantly impact our average response times due to the time taken to reach them by their nearest fire station. Prevention work is prioritised in areas where travel distances are above the average response time
- We are however, committed and work tirelessly, ensuring that we use our resources efficiently and effectively as well as aspiring to maintain and improve our response times wherever possible without compromising safety.

<b>Overall Incident Response Standard 13:00 minutes</b>	<b>12 mins 51 secs</b>
<b>Dwelling Fire Response Standard 11:00 minutes</b>	<b>11 mins 34 secs</b>
